

GİRNE ÜNİVERSİTESİ  
UNIVERSITY OF KYRENIA

University of Kyrenia  
2022-2023 Catalogue

# FOUNDING RECTOR'S MESSAGE

*Dear Students and Dear Parents,*

*I would like to welcome you by stating that we are proud of the level the University of Kyrenia has reached in a short period time. While establishing our university, we dreamed of creating an environment where our students can complete their education life safely and happily in the unique nature of Kyrenia. It is our greatest wish to train competent and well-equipped graduates who experience interaction and tolerance between cultures with the presence of students from different countries and can easily work anywhere in the world. We have taken and continue to take new steps every year to make this dream and wish come true.*

*Our university, which was founded in 2013 with three Faculties and one Vocational School affiliated with 10 programs, as of 2020-2021 academic year offers, 72 undergraduate degrees - associate degrees – postgraduate degrees approved by YOK / YÖDAK affiliated to 3 Institutes, 14 Faculties, 7 Vocational Schools in English and Turkish. Besides the basic sciences laboratory and infrastructure facilities;*

- We provide basic facilities for the programs within the Faculty of Medicine, Faculty of Dentistry, Faculty of Health Sciences and Vocational School of Health Services via Dr. Suat Günsel University of Kyrenia Hospital and Dr. Suat Günsel University of Kyrenia Dental Hospital;*
- We provide education at international level with Flight Simulation Training Device, our two training aircraft and the "TEA (Test of English for Aviation ) Center" that our Aviation and Space Sciences Faculty and Pilotage students receive training.*
- We provide education for our maritime program students with our two training and research ships, our Maritime Safety Training Center, our Ship Simulation Rooms, which consist of 7 separate units, including Full Mission Bridge.*
- We provide education for our Faculty of Dentistry students with Pre-clinical' Laboratory, Phantom Simulation Laboratory and Cast Laboratory;*
- We provide education in medical and healthcare programs with Anatomy (dissection) and Medical Practices laboratory;*
- We provide for our Tourism and Hotel Management program practice hotels belonging to our group,*
- and also with student clubs, social events and more we offer all kinds of opportunities to support our esteemed students to socialize .*

*While providing the necessary academic and physical infrastructures for education and research, we are aware of the importance of your social development, and we try to provide you with a suitable environment by enriching our curriculum with different contents such as clubs, events, conferences and panels.*

*Dear students; after graduating from our university, it is our greatest wish to fully prepare you for life, to graduate you with happy and beautiful memories, to keep in touch with you over the years, to develop and grow with your feedbacks, with the belief that you will be an ambassador of the University of Kyrenia in your professional life.*

*Dear parents; As a mother, I would like you to know that I understand all the concerns you face while sending your children that you care about and raise with love and care to another city, to another country, and with this awareness we make every effort to provide a safe and loving university environment for our prospective students.*

*Hoping to see you our prospective students among us, peace be with you ...*

*....to new horizons*

**ASST. PROF. CEMRE S. GÜNSEL HASKASAP**  
*Founding Rector*

**Prof. Dr. İlkey Salihoğlu**

*Rector*

# RECTOR'S MESSAGE

*Dear Students ,*

*The training process is similar to a long-term marathon that requires intensive work. Perhaps the most important decision of this process will be to choose a university that will shape your future, gives you the aim to graduate by collecting happy memories and meet your expectations in the best way. Since the day it was founded, University of Kyrenia has been continuously improving and growing and has taken its place among the leading higher education institutions of our country the Turkish Republic of Northern Cyprus with its successes.*

*Although the University of Kyrenia was established recently, it is based on the education and training experiences of its founders. In this context, our university started to provide education in 2013 by taking over the 26-year-long deep-rooted Maritime, Maritime Management , Marine Sciences Faculties and Marine Transportation Management Engineering Graduate Program and Maritime Vocational School with all its infrastructure and superstructures, from our sister University; Near East University. Thus, University of Kyrenia has been structured as an ideal higher education institution with its student, lecturers, necessary infrastructure for education, management, and experience and tradition from the past since its establishment. Correct structuring has immediately shown itself in academic, administrative and scientific fields. Our very solid academic staff, which has been created in this context, has a high scientific research capacity and rises, produces quality scientific publications to be proud of. In scientific quality publications, we have gone ahead of others that have been founded before our university and have more staff. We have successfully passed the YÖDAK-YÖK audits for academic and administrative competence.*

*As University of Kyrenia from day one, we have been working with our students, academicians, faculty members and administrative team to provide quality, interdisciplinary education with a participatory and student-oriented approach that respects diversity. We accept addresses sent by our graduates from different parts of the world and the achievements they have earned as an indication of this effort, but we are not satisfied with this and improve ourselves every day.*

*We invest in the most up-to-date infrastructure required by our programs with the learning environments we have created based on the principles of our main mission and continue to develop by using technology in the most effective way. In addition to our laboratories where our students studying in health-related fields can perform their hands on training, the Flight Simulation Training Device of the Faculty of Aviation and Space Sciences, the Ship Simulation Systems used in maritime programs and which is the cornerstone of the education of students, also Dr. Suat Günsel University of Kyrenia Hospital and Dental Hospital are good examples of the steps we have taken towards this goal. Our experienced academic staff consisting of the best in their field, our administrative staff that our students can reach at any time, our international students who provide multiculturalism will make significant contributions to your effort to reach the best in your education life.*

*Being aware of the realities of the 21st century and the expectations they create, we consider that our students' professional knowledge and skills as well as their physical and personal development are important in their careers, and we support their participation in the activities of student clubs and activities related to their interests throughout their education period at our university.*

*In the dynamic environment of our university, which is the only campus located on the seafront in Kyrenia, the pearl of Northern Cyprus; I wish you an educational life full of days that will shape your future by experiencing a safe and qualified student life, and collect happy memories with long-lasting friendships which you will cherish.*

*Love and respect,*

# WHY UNIVERSITY OF KYRENIA (UOK) ?

*University of Kyrenia established in 2013 by taking over the Maritime, Maritime Management , Marine Sciences Faculties and Marine Transportation Management Engineering Graduate Program and Maritime Vocational School with all its infrastructure and superstructures, from our sister University; Near East University.*

*As of 2020-2021 academic year UoK offers, 72 undergraduate degrees - associate degrees – postgraduate degrees approved by YÖK / YÖDAK affiliated to 3 Institutes, 14 Faculties, 7 Vocational Schools. University of Kyrenia is one of the fastest growing universities in Cyprus with its;*

- Student-centered innovative learning approach
- Hospitals equipped with the latest technology infrastructure, medical laboratories and imaging equipment, as well as Faculties of Medicine and Dentistry that provide well-rounded education
- Faculty of Aviation and Space Sciences Pilotage-Professional Pilot Training Department that provide education with two training planes, Flight Simulation Training Device (FSTD) and Mechanical Laboratory .
- 3 faculties, Academy, and Vocational School programs specialized in maritime and maritime management with two training and research ships along with advanced simulators ,
- Programs tailored to meet the needs of public and private sector,
- Academic and administrative staff that are leading experts in their field ,
- Opportunity to access NEU's experience, resources and infrastructure
- Modern campus situated along the seashore near to the city center and at a safe location
- With its 89.35% general scholarship rate and economic package options in the 2019-2020 Academic year .

# DISCOVER THE ISLAND

Imagine an island, which carries the glory of hosting different cultures and civilizations throughout centuries. Visualize an island, which carries a rich archaeological, historical and cultural heritage. Now you will receive education within the island that you have just dreamed.

The Turkish Republic of Northern Cyprus (TRNC) is a Mediterranean country, which was established in the North of Cyprus in the Eastern Mediterranean region, with a population of 374.299 according to the records of 2019. The island has five major cities, each with a unique beauty and historical value; the capital city Nicosia, Famagusta, Kyrenia, Güzelyurt (Omorfo) and Lefke. There are noteworthy historical beauties such as Selimiye Mosque (St. Sophia Cathedral), the Bellapais Monastery and the Karpaz Peninsula.

Our university will organize city tours to allow all of our students who will receive education here to discover the beauties of this island. The dates and times of tours will be announced on our website, official Facebook, and Instagram and twitter pages. Please follow our social media accounts in order to participate.

# LIFE IN TRNC

## CLIMATE

Turkish Republic of Northern Cyprus is blessed with sunshine and enjoys one of the healthiest climates in the world. The average annual temperature is about 20C / 68F. Summers are hot during July and August averaging over 30C / 90F. The coldest months are December, January and February with a mean temperature of 10C / 50F.

The sea temperature is the warmest in the Mediterranean, ranging from a mean average of about 16C / 61F in January, to 32C / 90F in August.

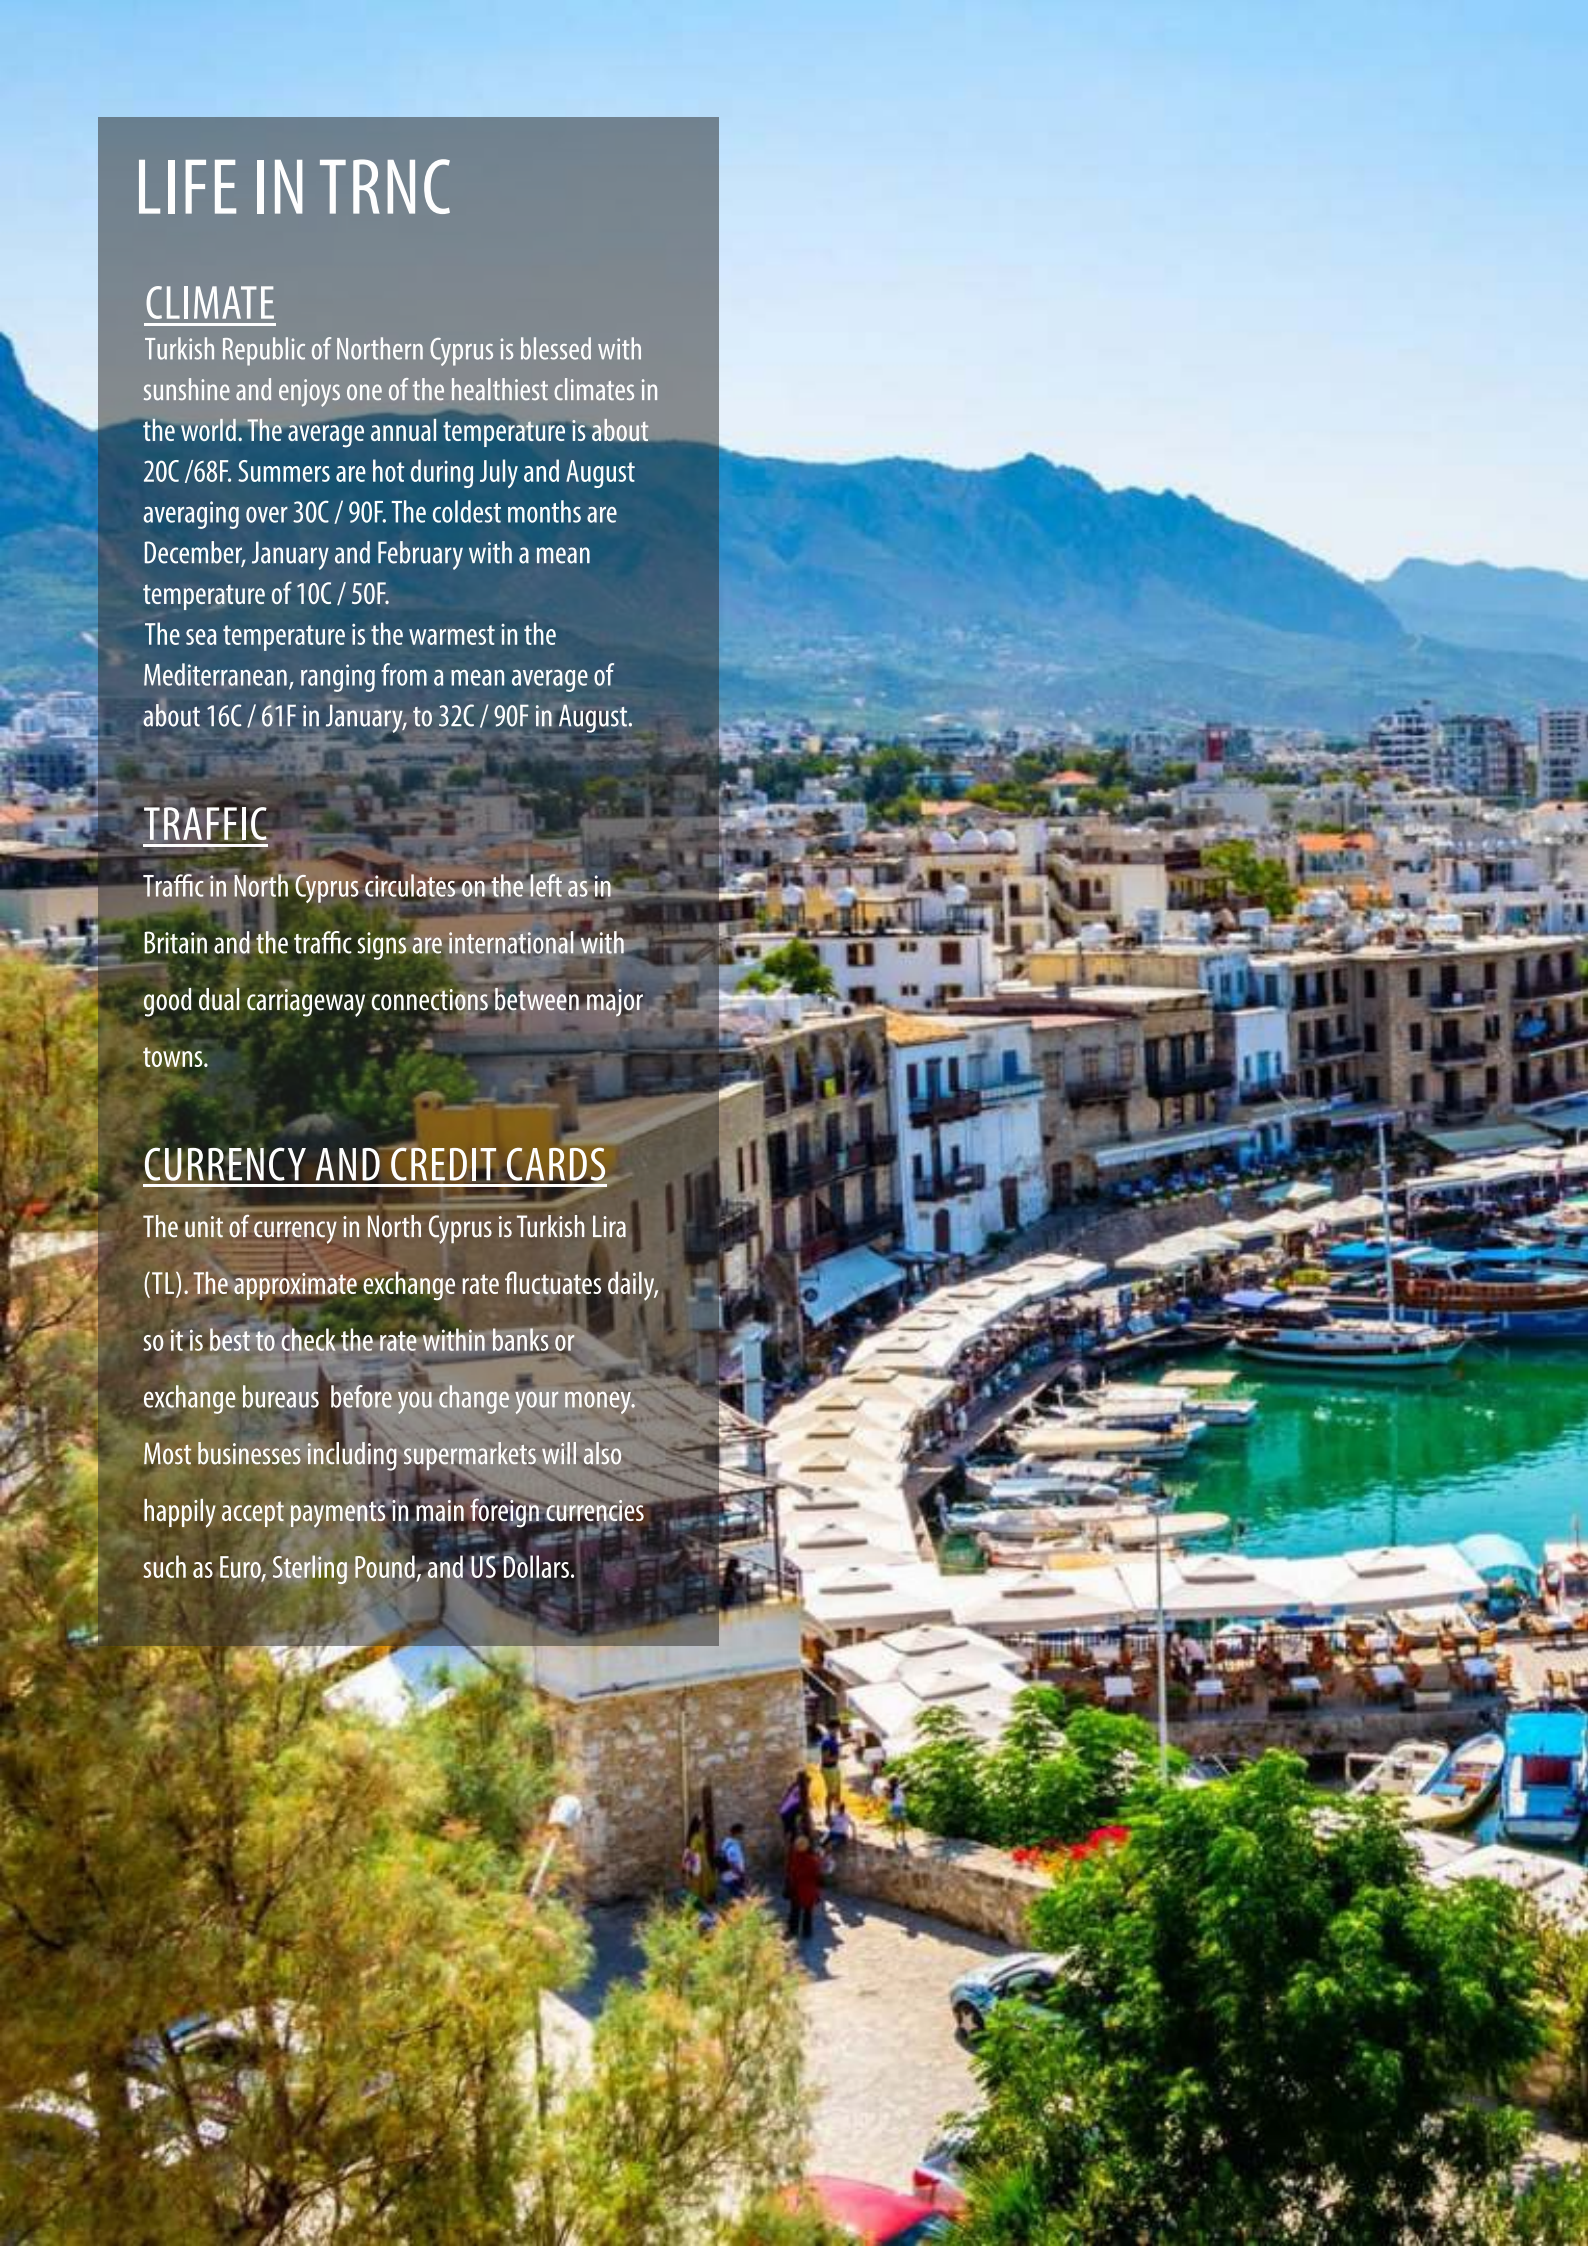

## TRAFFIC

Traffic in North Cyprus circulates on the left as in Britain and the traffic signs are international with good dual carriageway connections between major towns.

## CURRENCY AND CREDIT CARDS

The unit of currency in North Cyprus is Turkish Lira (TL). The approximate exchange rate fluctuates daily, so it is best to check the rate within banks or exchange bureaus before you change your money.

Most businesses including supermarkets will also happily accept payments in main foreign currencies such as Euro, Sterling Pound, and US Dollars.

# WHY KYRENIA ?

The history of Kyrenia dates back to the 10th century B.C. Being the first settlement of the small communities coming from the Aegean region and one of the ten kingdoms of the ancient times, Kyrenia is a historical city which bears traces of the various civilizations ruling Cyprus. The city located between the Five Finger Mountains in the South and the Mediterranean in the North. Kyrenia came under the Persian, Byzantine, British, Lusignan and Venetian rule and the Ottoman period began on the 9<sup>th</sup> of July 1570. Kyrenia as one of the most beautiful places of the Mediterranean offer tourists a unique atmosphere with its restaurants, bars and small hotels around the horseshoe-shaped harbour, where old structures have been protected.

## **Kyrenia with its;**

- Mediterranean climate and natural beauties
- Safe and peaceful atmosphere
- Coastline and clean beaches
- Historical places (Kyrenia Castle, Shipwreck Museum, Bellapais Monastery , Monument of Peace and Freedom , Blue Pavilion)
- Cultural activities
- Mountain walks, exploring natural sites, land, air and water sport activities
- Entertainment venues

Provide a safe environment in which students can develop their social personalities during their education period

# FACILITIES

- ▶ International Diploma - validated By YOK, recognized all over the World
- ▶ Fully Equipped Hospital
- ▶ Fully Equipped Dental Hospital
- ▶ Two Training Planes
- ▶ Flight Simulation Training Device (FSTD)
- ▶ Two Training and Research Vessels
- ▶ Maritime Safety Training Center
- ▶ Ship Simulation Labs
- ▶ Practice Hotels
- ▶ Laboratories
- ▶ Grand Library
- ▶ Cafeteria
- ▶ Stationery Store - Copy Center
- ▶ Near East Bank Branch and ATM
- ▶ Accommodation (\*)

(\*) For accommodation students can benefit from University of Kyrenia's Park Palace Residence dormitories in Kyrenia Karakum and Near East University (NEU) dormitories .  
Dormitories can be rented on a semester or an academic year basis.  
Applications for dormitories can be made at our campus or International representative offices.

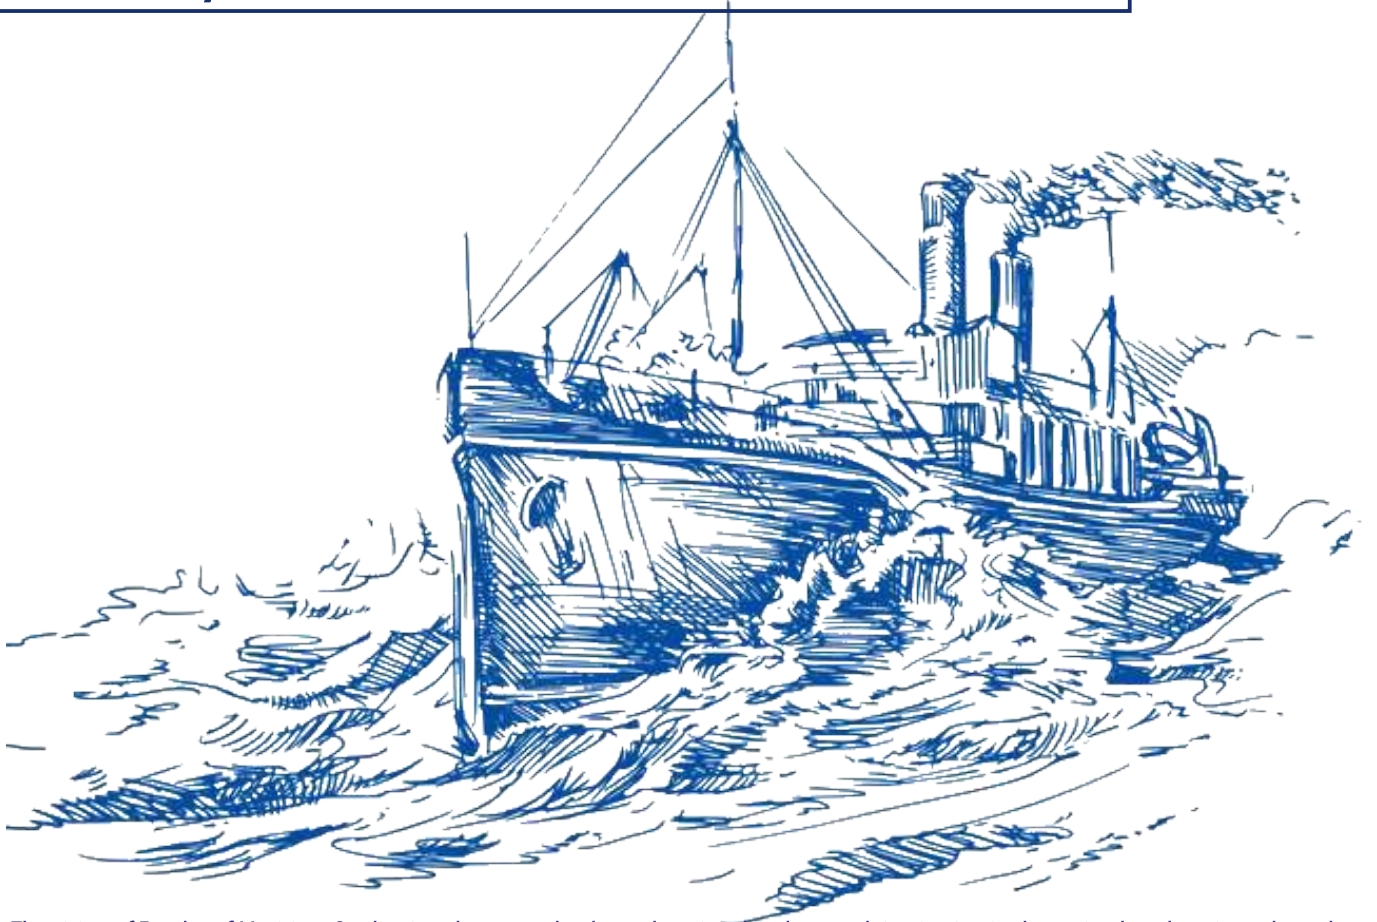

# FACULTIES

# FACULTY OF MARITIME STUDIES

The vision of Faculty of Maritime Studies is to become a leading educational and research institution in the region by educating talented graduates equipped with universally accepted knowledge. The main mission of Maritime Studies Faculty is to educate qualified graduates who are aware of global and local facts who recognize the world, our country and their own country, who respect human rights and environment, and who can create instant and long term solutions. To meet the qualified personnel needs of world shipping fleet which is rapidly growing and also to educate seafarers equipped with universal maritime knowledge and skills in accordance with the international standards recognized by the T.R Ministry of Transport, Maritime Affairs and Communications, and International Maritime Organization (IMO) constitutes another important part of our mission.

## Departments :

- Maritime Transportation Management Engineering
- Marine Engineering

## Job Opportunities :

- Maritime Transportation Management Engineering; The graduates of this department can be recruited in mercantile vessels traveling long voyages as third officer up to Captain, and can take up technical responsibilities in vessel construction (shipbuilding) yards and maritime companies.
- Marine Engineering graduates have the opportunity to work in various positions ranging from fourth engineer to chief engineer respectively. Furthermore, they can work as engineers and take responsibilities in various factories, shipyards, hotels, workshops and all technical fields. Besides, they can take technical responsibilities in shipbuilding related companies and centers.

## Facilities:

- Two Training and Research Vessels (R/V TEAL, TEAL Jr.)
- Marine Safety Training Center
- Fire Training Station
- Abandon Vessel Training Platform
- Lifeboat
- Inflatable life-raft
- Rescue Boat
- GMDSS (Global Maritime Distress and Safety System) Simulator
- ARPA Radar / ECDIS (Electronic Chart Display and Information System) Simulator
- Tanker Simulator / Liquid Cargo Handling (LCHS) Simulator
- Engine Room Simulator
- Main Engine Control Room Simulator
- Full Mission Bridge Simulator
- Secondary Bridge Simulator
- Hydraulic Pneumatic Lab.
- Electro technology and High Voltage Lab.

# FACULTY of MARITIME MANAGEMENT

Maritime transportation is still very important in the international economic and business activities. The major aim of our faculty is to form students with the basic maritime management and administration skills needed for harbor and ship management. The faculty aims to bring up staff of management, able to compete in the field and follow the changes in the marine sector. Our vision is to provide both theoretical and practical studies within a 4-year period in a modern environment.

## Departments :

- Maritime Management

## Job Opportunities :

The graduates of Maritime Management department can be recruited as central staff of maritime enterprises, port operators, maritime agencies, ship chandlers, maritime insurers, and marina administrators.

# Faculty of Tourism

University of Kyrenia, Faculty of Tourism was established in 2020 to provide education to our students through two departments; **Gastronomy and Culinary Arts** and **Tourism Management** undergraduate programs.

The mission of the University of Kyrenia Tourism Faculty is to provide excellent education via constantly updated curriculum with the cooperation of all parties and to provide its students with the necessary knowledge and equipment in their fields. The underlying understanding of contemporary undergraduate education carried out in our Faculty of Tourism is to establish a close communication with the students and to bring the questions and expectations of the students on academic and social issues to the attention of the lecturers and faculty management. Another very important feature of our faculty is that it hosts international students from many different countries. This allows students to meet and mingle with different cultures, increasing the opportunities for graduates to find a job in national and international institutions and organizations.

## Departments

Tourism Management  
Gastronomy and Culinary Arts

## Facilities

The Faculty of Tourism programs offers students the opportunity to blend theory with practice, with its restaurants, cafes and hotels where students work as part of their weekly work experience program within the university.

## Job Opportunities

- The graduates of Tourism Management department have the opportunity to find a job in different areas of the tourism industry. They can be employed by the transportation companies, international hotel chains, tour operators, agencies and by the companies operating in airline and marine industry.
- Gastronomy and Culinary Arts specialists work in places such as restaurants or hotels in the tourism, travel and transportation sectors, where the eating, drinking, entertainment and accommodation activities can be done together. Generally, there are opportunities to work in large restaurants and restaurants with a special customer portfolio, where meeting and catering services can be provided. Gastronomy and Culinary Arts specialists also work where food products are processed and can be served immediately to the customer. In addition, they also work in food factories that produce food using industrial methods. Likewise, restaurant and fast food businesses that have changed by developing in the service sector will also be a key factor for employment. In addition, students can have the title of doctor in this field by completing their master's and doctoral education.

# FACULTY of DENTISTRY

The academic staff of our faculty is prepared to provide world-class education with the latest technology equipped Dental Hospital and laboratories. Our goal is to train our students as scientifically well equipped, responsible, culturally rich, innovative, and successful in human relations, respectful to ethical values and highly self-confident dentists, that attach importance to public health, and most importantly serve humanity by feeling the value of their profession deeply.

## Facilities :

- Preclinical Laboratory
- Phantom Simulation Laboratory
- Cast Laboratory
- Dental Hospital facilities for practice
- Integrated Student Clinic

## Job Opportunities :

Faculty of Dentistry graduates; can work in public and private sector hospitals, university research hospitals, oral and dental health centers, and private clinics. In addition, they can open their own clinics or work as academics.

# Faculty of Education

Educational sciences defines a general domain that covers fundamentally the entire processes and concepts related to education and teaching. Educational sciences is considered as the study of improving the teaching process including many study subjects ranging in a wide spectrum from psychology of learning, school counselling, assessment and evaluation methods, to determination of policies concerned with education and school management.

As the Faculty of Education by creating a contemporary teaching culture, we act with the vision of raising students who are respectful to social values , who can use information and communication technologies effectively, makes researches, sharing, productive and respectful of social values. The main basis of our faculty, which accepts the goal of training qualified teachers needed at national and international level as an important element of its mission, is [Mustafa Kemal Atatürk's](#) statement, "[The future belongs to an education built on a strong foundation, and education is based on teachers](#)".

## Departments :

- English Language Teaching
- Physiological Counselling and Guidance
- Turkish Language Teaching
- Special Education Teaching

## Job Opportunities :

**English Language Teaching ;** Students who graduate from programme will be able to follow a wide range of professional opportunities in a variety of modern teaching environments. The programme is designed to prepare students to teach nationally and internationally, in both public and private institutions. In addition to employment in the classroom, graduates may also be able to work in academia, education management and policy, or publishing.

**Physiological Counselling and Guidance;** The graduates of this department can find employment opportunities in various sectors such as education and business sectors. Graduates can be recruited by schools giving education at all levels, by commercial institutions which offer psychological counselling and guidance to their employees, by state departments where such guidance and counselling services are offered, by the Ministry of Education, and can privately open clinics to offer service to the public.

**Turkish Language Teaching graduates;** They can teach Turkish in public and private schools.

**Special Education Teaching graduates;** They can work as special education teachers in schools and guidance research centers that serve , children with special needs.

# FACULTY OF ARTS AND SCIENCE

Our Psychology Department within our Faculty of Arts and Sciences act with the aim of raising graduates who will contribute to the progress of modern psychology and its application for the benefit of society and humanity.

In this context, our main purpose is to train qualified psychologists who are equipped with the psychology science knowledge, who closely follow the developments in their field, take responsibility and are productive.

## Departments :

- Psychology

## Job Opportunities :

Psychology Department graduates have the opportunity to work in Health Institutions, Psychological Counselling Centers, Kindergartens, Nursing Homes and Rehabilitation Centers, Prisons, Special Education Centers, Survey Companies, Human Resources Departments.

# FACULTY OF AVIATION AND SPACE SCIENCES

Our Faculty of Aviation and Space Sciences' departments provide education for those who interest in professions that are in high demand today. In line with the needs of the globalized world, the language of instruction has been determined as English.

Our vision is to be the best Aviation Faculty in the region by offering a comprehensive aviation programme that trains innovative and entrepreneurial modern individuals who are creative thinkers with strong social skills, and who have the ability to carry out international scientific studies.

Our mission is to be a prominent, pioneering educational institution that trains individuals who are both critical and inquisitive, with knowledge of contemporary situations, and who know how to access knowledge; individuals who are able to innovate environmentally conscious solutions in a rapidly changing world; and who are life-long learners with the skills to transfer knowledge effectively.

## Departments :

- Aviation Management
- Pilotage (Professional Pilot Training )
- Aeronautical Engineering

## Facilities :

- Universal Material Tester
- Forces in a crane
- Dry Friction
- Deformation of a crane beam
- Deformation of Euler Buckling
- Computer Based Training Room
- Flight Simulation Training Device (FSTD)
- 2 training aircrafts

## Job Opportunities :

**Aviation Management** graduates have the opportunities to be employed in various sectors at international level, at departments of state and private institutions and foundations of aviation sector such as cargo services, flight operations, ground services of airports and designing airport services.

**Pilotage (Professional Pilot Training)** graduates will gain the right to be conferred upon the undergraduate diploma as well as Air Transport Pilot Licence (ATPL). The graduates of this department will have extensive opportunities to be employed by state and private sector companies as pilots. The graduates of this department have a significant advantage that this sector is growing rapidly and need to well-qualified staff is also increasing gradually, and in future, the need to qualified staff in this sector will apparently continue to increase.

**Aeronautical Engineering;** The sector of the civil aviation is the fastest growing sector for the last 40 years and is in a gradual and steady progress of development in our present day. The sector demands qualified staff in every aspect of the field. The graduates have much higher chances to be employed by the aircraft manufacture companies as well as the companies operating in civil aviation sector and the income of aeronautical engineers is considerably higher than qualified staff employed in other sectors.

# FACULTY of LAW

The aim of our Faculty of Law, which aims to raise people with a strong legal mission to our country, which is founded on democratic and secular foundations, is to add value to our country and to shape its future. The vision of the Faculty of Law is to be a preferred institution with a strong infrastructure which raises graduates who believe in the rule of law and justice, who are aware of ethical values, who can nationally function in the judicial system and when necessary compete internationally in the prosecution stages. Our mission is to raise independent, imaginative and knowledgeable lawyers, who are able to investigate and research, to perceive and interpret developments in the society and in the world, to assimilate human rights and contemporary universal law principles, equipped with strong theoretical and technical knowledge both in public and private law and who acquire social responsibility.

## Departments :

- Law

## Job Opportunities :

Faculty of Law graduates; can carry out traditional legal professions such as judges, lawyers, prosecutors, notaries, as well as academicians, legal counsel in public institutions, experts in different fields or diplomats.

# FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES

The faculty has undertaken its fundamental objective to provide world-class education in cooperation with all stakeholders and to ensure that its graduates can find national and international jobs by providing them with the necessary knowledge and skills in their fields. Our faculty aims to provide contemporary education to our students with dynamic academic staff with international knowledge and experience and constantly updated course programs. Our students are raised as individuals who can meet the needs of national markets and compete on a world scale thanks to the education they receive.

## Departments :

- Banking and Finance
- Business Administration
- Logistics Management
- International Relations

## Facilities :

- Practice Hotel

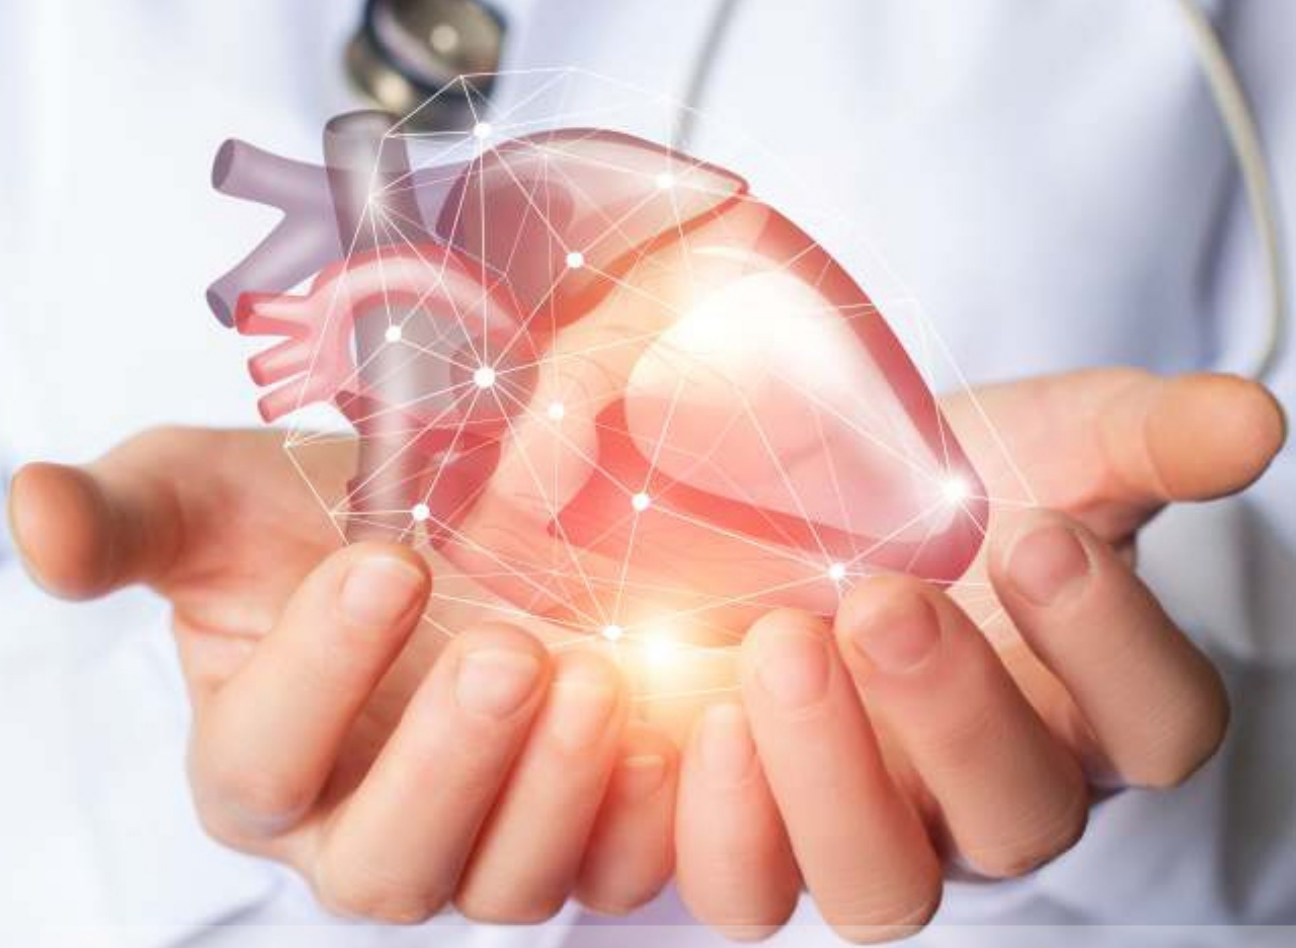

## Job Opportunities :

The graduates of the Banking and Finance Department are able to work as a senior manager in financial institutions or as a finance director (CFO) in non-financial institutions. Apart from the finance sector, they can work in departments mainly related to money and investments such as strategic planning, accounting, and finance.

Business Administration graduates have the opportunity to be recruited as an administrator or consultant by national and international companies. In addition, graduates could be employed as a midlevel, senior manager, marketing specialist, manager financial specialist, manager, human resources specialist or as a human resource manager recruited by the industry, trade and information organizations.

Logistics Management Department graduates are able to work both in public institutions and in the private sector. Also our graduates can work in aviation, land, maritime and railway companies, airports, ports and cargo businesses, which carry passengers and all kinds of goods. The courses offered by the International Relations Department prepare students to enter the increasingly globalised labour market and to achieve positions in the diplomatic service, government ministries, EU institutions, UN, local and international governmental and non-governmental organisations, media organisations, large corporations, think tanks and research centres.

Tourism and Hotel Management graduates have the opportunity to find a job in different areas of the tourism industry. They can be employed by the transportation companies, international hotel chains, tour operators, agencies and by the companies operating in airline and marine industry.

# FACULTY of HEALTH SCIENCES

Access to qualified and reliable health services is one of the basic human needs. There is always a need for qualified educational institutions where health team members will be trained to meet this basic requirement. University of Kyrenia Faculty of Health Sciences was founded with the aim of educating qualified, well-equipped health professionals who are committed to ethical values, open to development and change, and who have a team spirit. Our Faculty of Health Sciences includes the following programs; Nursing, Nutrition and Dietetics, Physiotherapy and Rehabilitation.

In addition to the theoretical courses that our students will take during their education, they will also receive practical training under the supervision of instructors at Dr. Suat Günsel University of Kyrenia Hospital which is equipped with laboratories and the latest technology necessary for their education.

## Departments :

- Nursing
- Nutrition and Dietetics
- Physiotherapy and Rehabilitation

## Facilities:

- Nursing Skills Laboratory
- Physiotherapy and Rehabilitation Department Laboratory

## Job Opportunities:

Physiotherapy and Rehabilitation graduates receive the title of physiotherapist and can work in public and private hospitals, medical centers, exercise consultancy centers, private training centers, sport clubs, gyms, nursing homes, wellness centers, rehabilitation centers, university hospitals, and open private exercise counselling centers.

Nursing Department graduates can work in public or private institutions; hospitals, health centers, rehabilitation centers, private branch centers, community health and family health centers, workplaces, education institutions, home care services, nursing homes, dispensaries, nurseries etc. or as an academician in higher education institutions.

Nutrition and Dietetics Department graduates have employment opportunities in various areas such as: Inpatient Treatment Institutions, Renal Care Units, Diabetes Education Centers, Enteral-parenteral nutrition teams, Private Diet Polyclinics, Catering Industry (in kindergartens, schools, food factories, food and beverage services within hotels, and all institutions providing catering etc.), Food Industry, In private or public institutions related to food and nutrition, in public health services; maternal and child health centers, family health centers, elderly care centers and sport centers. They can provide services such as research, education, treatment and rehabilitation in educational and research institutions. They can also work as executive dietitians.

# Faculty of Architecture

As Faculty of Architecture our mission is to educate leaders, architects and interior architects who have scientific and technological equipment that compete in national and international platforms, who are competent in the national and international platforms and can compete in the field at international quality and level, protects and preserves the environment, guides and develops the future of architecture, enriches the aesthetic values, respects the ethical values, are creative and unique, and unifies all the disciplines of architecture. Prioritize our pioneering in research and information to produce national and international publications that will light the historical texture of the country, the preservation of its ecological balances, the development of cities and communities. Our vision is to lead in education and research, take pride in architects and interior architects who are environmentally aware, create structures with high level of unique aesthetics that competes at International level of fields in architecture and interior architecture.

## Departments :

- Architecture
- Interior Architecture

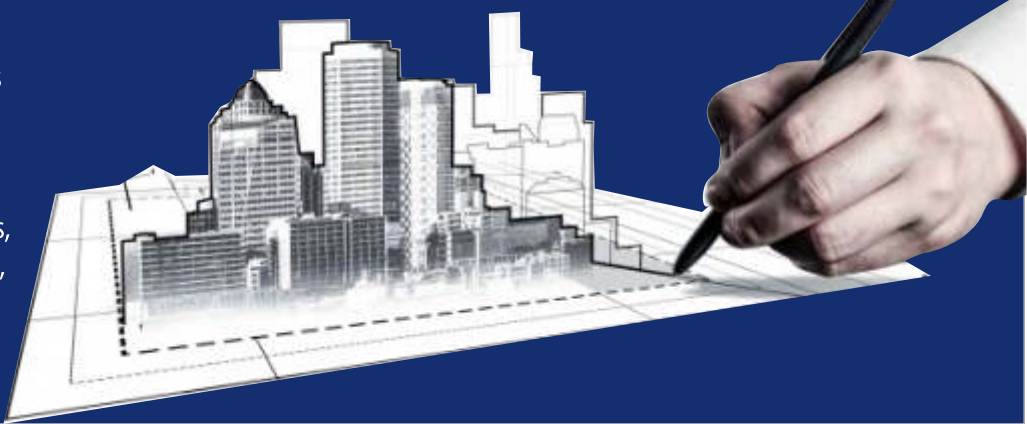

## Facilities :

- Computer Laboratory / AutoCAD Laboratory

## Job Opportunities :

**Graduates of Architecture Department** can be recruited in all state and private sectors such as ministries interested in the developments and infrastructure of the state, municipalities, private design studios and companies, or can run their own business privately.

**Interior Architecture Department** graduates have employment opportunities at various institutions and states, and private sectors such as municipalities, companies focusing on industrial designs, private design studios, furniture design and production companies, or can also run their own business.

A top-down view of an engineering workspace. A yellow hard hat sits at the top left. A yellow level and a yellow tape measure are scattered across the top. A pair of safety glasses and yellow earplugs are on the right. In the center, a person's hands are using a yellow pencil to draw on a technical blueprint. Various other tools like a protractor, a set square, and a vernier caliper are visible. A laptop is partially visible on the left. The background is a dark blue gradient.

# Faculty of ENGINEERING

The Faculty of Engineering provides quality education and training opportunities to ensure that its graduates are well educated to take the leading roles in their profession. In this respect, we are dedicated to train highly motivated and knowledgeable engineers who are able to clearly define and solve problems, work in multidisciplinary settings within a variety research facilities and team-integrated research and teaching activities, and appreciate the needs for innovation. The Faculty of Engineering of University of Kyrenia aims to be a leading center of innovation and creativity, dedicated to education, science, research, lifelong learning and entrepreneurship in the fields of engineering and natural sciences, sensitive to nature and environment, integrated with society.

The Faculty of Engineering of Girne University is committed to conduct interdisciplinary work at an international level and embrace original thinking to train innovative engineers fueled by leadership talent and entrepreneurial drive, who are socially responsible, culturally aware and respectful of the ethical values of their profession to create and disseminate knowledge and technology

## Departments :

- Electrical and Electronic Engineering
- Computer Engineering
- Mechanical Engineering
- Civil Engineering
- Software Engineering

## Facilities:

- Electronics Laboratory
- Computer Laboratory / AutoCAD
- Laboratory
- Mechanics Laboratory

## Job Opportunities :

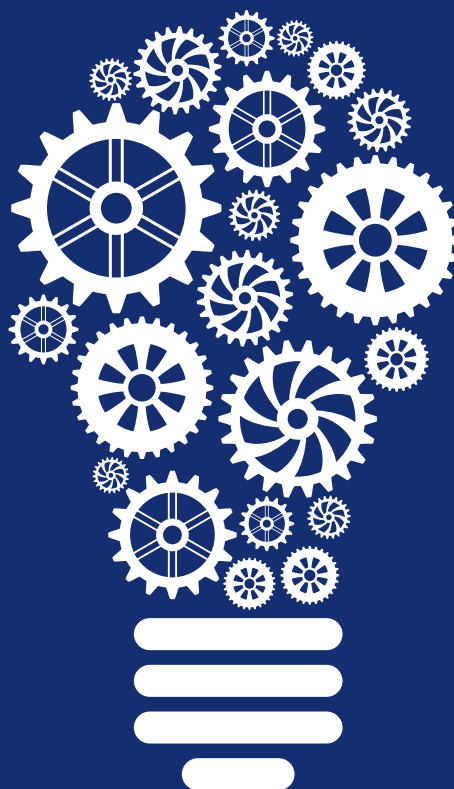

**Computer Engineering Department** graduates can work as a computer engineer and specialist, they have a wide range of job opportunities in private and public institutions in many technical fields such as system engineer, system programmer, design engineer, programmer, information technology specialist, communication network engineer.

**Graduates of Civil Engineering Department** graduates can find job opportunities in all kind of state and industrial construction sectors which require planning, designing, constructing, controlling of constructions and infrastructures of industrial buildings and investments such as dams, airports, bridges, roads, harbours, sewerage and drainage systems, waterworks, and so on.

**Graduates of the Department of Mechanical Engineering** can find employment in industry, in the departments including production, maintenance, quality control, design and management, in companies giving engineering services and mechanical consultancy, in power plants, in the field of accessing sources of energy such as petroleum, gas, sunlight and wind, in metal production plants and foundries and many others.

**Electrical and Electronic** graduates have been employed in related jobs in countries all over the world. Our graduates can be employed as power systems engineers, communication systems engineers and control system engineers within industrial areas.

**Software Engineering Department** graduates can be employed in public offices, municipalities, private companies, educational institutions or could set up their own business. Students who graduate from the Software Engineering department are able to work as a system analyst, system engineer, design engineer, web design and program specialist, information technology specialist, application programmer, management in information technology departments of companies, data management, computer aided industrial design and application engineer.

# FACULTY of MEDICINE

As part of University of Kyrenia, our Faculty of Medicine aims to educate the leaders of tomorrow who serve the public, who can successfully represent their institution and country in the national and international arena and to become a successful education and health institution in accordance with the universal standards. In addition to the highly qualified training staff and strong technology infrastructure facilities of the campus one of the strengths of the faculty is the opportunity provided to students to realize their practical training under the supervision of faculty members and experienced staff at Dr. Suat Günsel University of Kyrenia Hospital, which is equipped with latest technological systems. The courses are enriched by professional and clinical skills and allows students to gain their professional experience from the first academic day. In addition, the program consists of research methodology, ethical and social contents.

## Departments :

- Medicine

## Facilities :

- Anatomy Laboratuvarı
- Histology-Embryology Laboratory
- Microbiology Laboratory
- Pathology Laboratory
- Biochemistry Laboratory
- Physiology Laboratory
- Hospital facilities for practice

## Job Opportunities :

Faculty of Medicine graduates can work in public and university hospitals, private hospitals and polyclinics, and health centers. They can continue their academic career and open their own clinics in their chosen field.

# Faculty of Pharmacy

Pharmacy has been one of the most respected professions of all cultures throughout history. Pharmacy is a profession in which theoretical education and practical training are given at the same time. With our infrastructure facilities prepared in this direction, we act with the aim of raising graduates who are honest, beneficial to society, have analytical thinking and are inclined to group work.

## Departments :

- Pharmacy

## Job Opportunities :

Faculty of Pharmacy Graduates have the opportunity to open their own pharmacy and work in personal pharmacies, hospital pharmacies and clinics, pharmaceutical industry, cosmetic companies, forensic medicine institutions, pharmaceutical warehouses, industrial pharmacy institutions and clinical research laboratories, as well as build an academic career.

# VOCATIONAL SCHOOLS

# VOCATIONAL School of JUSTICE

The graduates of Vocational School of Justice can continue their education in four-year undergraduate programs as well as step into professional life. The course contents of the program have been created in order to equip students with real work experience and to integrate the subjects they have learned in the lessons into their lives. Qualified personnel who possess the knowledge and skills required by the business world are trained in the Vocational School of Justice. Graduates with basic law knowledge have the opportunity to work in a wide range of justice services at different levels and in many fields, especially in the judicial service.

## Departments :

- Justice

## Job Opportunities :

Graduates can work in law firms, other institutions operating in the field of law, in the law departments of different businesses, in banking and other financial institutions as experts or legal affairs office managers. Graduates can also be employed as distinguished experts with responsibility in the justice bureaucracy, within the judicial and administrative justice organization, and in public administrations with legal units.

# MARITIME VOCATIONAL School

Maritime Vocational School aims to train qualified and self-confident students who are equipped with the international knowledge and skills in order to meet the requirements of today's world, who can solve problems by focusing on team-work, equipped with leadership skills and entrepreneurial awareness in accordance with the human-power requirements of maritime field of our country.

We are adopting an interactive education which will enable our students to become professional individuals with efficient knowledge and ethical values essential for the industry, also acquired with intellectual accumulation, innovation and social responsibility, who will also respect their environment.

## Departments :

- Maritime Transportation Management
- Ship Machinery
- Maritime Management and Operations
- Underwater Technologies

## Facilities :

- Two Training and Research Vessels (R/V TEAL, TEAL Jr.)
- Marine Safety Training Center
- Fire Training Station

- Lifeboat
- Inflatable life-raft
- Rescue Boat
- GMDSS (Global Maritime Distress and Safety System) Simulator
- ARPA Radar / ECDIS (Electronic Chart Display and Information System) Simulator
- Tanker Simulator / Liquid Cargo Handling (LCHS) Simulator
- Engine Room Simulator
- Main Engine Control Room Simulator
- Full Mission Bridge Simulator
- Secondary Bridge Simulator
- Hydraulic Pneumatic Lab.
- Electro technology and High Voltage Lab.

## Job Opportunities :

**Maritime Transportation Management** is a very fast growing field as most of the world's trade is carried by marine vessels. Due to the growing demand for oceangoing deck officers and captains, job opportunities are great in this field. Students who graduated from our department have the opportunity to be employed on-board in various positions ranging from Fourth Officer, Third Officer to Oceangoing Master/Unlimited Master. Furthermore, they can be employed in owner companies as senior managers after gaining adequate experience and skills. Maritime Transportation Management Engineering is a career field with broad job opportunities and it is one of the rare departments with far possibility of staying unemployed.

**Ship Machinery** students are required to have 6 month applied marine training. Following this, students gain the right to take the "Third Officer/Mate" Examination held by the TR Ministry of Transport, maritime Affairs and Communications.

**Maritime Management** and Operations students after graduating from the two-year program of this department, students have the opportunity to be recruited in agents of the marine sector as ship brokers, incumbents of ship operation as well as being recruited as intermediary staff within marine, harbour and customs units.

**Underwater Technologies** graduates can work in domestic and overseas dive sites, marine companies, underwater construction companies (tube passage, pipeline etc.), oil companies, underwater consulting and projecting companies, port constructions, shipyards, underwater excavation archaeological teams and scientific organizations, private diving and rescue companies, are public institutions.

# VOCATIONAL School of TOURISM AND HOTEL MANAGEMENT

The Vocational School of Tourism and Hotel Management aims to prepare students for managerial and academic positions in their future careers by providing them with a contemporary education programme that caters for the needs of the tourism industry. All of our academic and administrative staff works with a team spirit towards training students to serve the needs of the tourism industry, which demand for qualified staff. Equipped with the required knowhow, students learn to think analytically and learn how to perform their future profession. The curriculum is prepared to equip students with core business skills and gives insights into the industry.

## Departments

Cookery

## Facilities

The Vocational School of Tourism and Hotel Management programs offers students the opportunity to blend theory with practice, with its restaurants, cafes and hotels where students work as part of their weekly work experience program within the university.

# VOCATIONAL School of TECHNICAL SCIENCES

As the Vocational School of Technical Sciences, our goal is to train staff who can compete in the international arena, offer unique, innovative and sustainable solutions to the problems they face, have high practical skills, can work in interdisciplinary teams and take key positions. Our mission is to become a technology-based scientific institution in our country and in the world by providing quality education, training and research opportunities, and also to educate students who are environmentally conscious, open to development, respectful to ethical values. Our vision to be a Vocational School that has academic staff who adopt contemporary science, technology, and research as the principle of lifelong learning and teaching, creates, prioritizes intellectual knowledge and interdisciplinary cooperation, is preferred in the first place, respects ethical values, constantly updates the research, development and education-training infrastructure, develops projects that will transform knowledge into social and industrial benefits, and cleaner production awareness with the harmony of ecological, technological and economic components.

## Departments :

- Computer programming
- Environmental Protection and Control

## Job Opportunities :

**Computer Programming Department** graduates will be able to work as system analyst, system programmer, design programmer, web design and program specialist, information technology specialist, application programmer, management, data management and data miners in companies' data processing centers.

**Environmental Protection and Control Department** graduates can work in Wastewater Treatment Plants, Recycling Facilities, Drinking Water Treatment Plants, Municipalities, Ministry of Environment and affiliated units, hospitals affiliated to the Ministry of Health, Private Hospitals.

The Vocational School of Foreign Languages consists of three separate components.

The Undergraduate English Unit, the Modern Languages Centre and the Academic Writing Support Centre work independently towards providing students of all faculties and vocational schools with the language skills required to study effectively in an academic environment.

This Unit offers a selection of compulsory and elective English language courses and aims to teach the skills necessary for the successful completion of an undergraduate degree.

The courses are designed to help students with a broad range of competencies progress from basic English to more advanced proficiency in English, enabling them to communicate confidently and effectively in a classroom setting.

The primary aim of this centre is to make a selection of foreign language accessible and enjoyable for the students at the University of Kyrenia. The Modern Languages Centre offers the students the opportunity to gain a high level of proficiency in written and spoken German, French and Greek. Recognizing the importance of modern languages in developing multicultural awareness, the centre promotes and encourages the learning of languages for academic, personal and professional purposes through an intensive language programme.

The Academic Writing Centre aims to help students develop a writing style which is lucid, concise, structured and backed up by evidence-based reasoning. The Academic Reading and Writing Skills courses are offered within the framework of the Undergraduate English Unit and are supported through seminars and workshops to further familiarize students with the conventions and genres of academic writing. Participants are instructed in defining the breadth of the research subject, constructing logical arguments, collecting, interpreting and reporting data to using correct terminology, and appropriate citation. Students also receive detailed feedback on their writing samples and are taught to cast a critical eye over the quality of their own writing.

## Departments:

- Applied English-Turkish Translation

Distance Education is a type of education, which is being compared with traditional education and has confirmed its effectiveness with the results obtained from the studies. Distance education provides advantages to both teachers and students in various ways. Distance education, which offers flexibility in time and place for both teachers and learners, can be used in different educational platforms.

## THE FOUNDATION ENGLISH PROGRAMME AND EXEMPTION

---

The primary objective of our programme is to promote necessary language and study skills that will help you pursue your academic studies successfully.

The Foundation English Programme aims to provide the necessary language and study skills in order for students to pursue their academic studies. The required level of proficiency is equivalent to the CEFR's (Common European Framework of Reference for Languages) B1 or B1+ (for Graduate Students, the Department of Pilotage and the Department of English Language and Teaching) level.

Students who do not achieve the required grade in the Proficiency Test (75% for the Department of Pilotage, 70% for the Department of English Language and Teaching, and 60% for the other departments) must attend the classes in the FEP.

# SCHOLARSHIPS

University of Kyrenia offers various scholarship opportunities; 50% scholarship for all international students for selected programs, Sports scholarship, Special Package Offers, Sibling Discount

## SCHOLARSHIPS FOR INTERNATIONAL STUDENTS

These scholarships are given in order to increase the inflow of the students and to advertise TRNC to foreign countries. Awarded students get a special discount on their tuition and fees.

## SCHOLARSHIPS FOR ATHLETES

The scholarship is given by the educational foundations of the University of Kyrenia as an award to aid-less students and to those who are currently and actively enrolled in various sport clubs of the university.

## SIBLING DISCOUNT

Uok offers a 10% sibling discount for all students except for those studying Professional Pilot Training, Dentistry and Medicine. Students who have a scholarship over 50% are not eligible for a sibling discount.

- One or more of the aforementioned documents are required to make an application to University of Kyrenia depending on the country of origin.

For further information, please contact [info@kyrenia.edu.tr](mailto:info@kyrenia.edu.tr)

# LIBRARIES

A library is one of the major factors that contribute to education. Our library has 20,000 printed materials in different languages and access to 1,500,000 electronic databases. It also has a L.C classification system, which is adopted by libraries in the USA, Canada and Mexico to allow users to access information quickly.

In addition, our library provides a comfortable environment for students with a seating capacity of 100 people. The library is fully equipped with computers, internet access and a Wi-Fi network.

Students of University of Kyrenia can also benefit from Near East University Grand Library.

Our modern and fully equipped library is open to everyone only on weekdays from 08:00 to 24:00.

In addition, the Kyrenia University Grand Library, which is newly build in the constantly growing University of Kyrenia, is at the service of students and the people of the region 24 hours a day with its modern and equipped 6-storey building on an area of 8,750 square meters. Users can access 500,000 books and 650 million electronic resources in the University of Kyrenia Grand Library, which is the largest library in the Kyrenia region. The University of Kyrenia Library is designed to increase the scientific productivity of the region as well as the mobility in social and cultural life. Within the library, a lecture room for 350 people, 3 halls for 120 people and classrooms and 4 meeting rooms are also available to the local people.

## SOCIAL AND CULTURAL CLUBS

The objectives of the student clubs affiliated with University of Kyrenia, Health, Culture and Sports Department; to educate students who can take initiative, have strong social and cultural aspects, are active, have a sense of solidarity, can work individually and in teams. As well as giving importance to quality education, many activities are organized at the University of Kyrenia to reinforce this objective. New activities and facilities are provided every year in line with the demands of the students. We have 23 clubs and 8 teams under the roof of Health, Culture and Sports Department within our university. Our university, which is located very close to Kyrenia city center, also uses this advantage in its social and cultural activities.

---

## HEALTH, CULTURE AND SPORTS DEPARTMENT

Universities are places where you can receive education at high level professionally, and on the other hand, you can improve your social, cultural, artistic and sport skills. The purpose of universities, in which all kinds of freedom of thought and discussions take place and where culture of democracy is gained, is to raise qualified people, to produce science and technology, to develop projects, to ensure the cultural development and transfer.

University of Kyrenia with the awareness of the need to invest in people on the road to the knowledge raises; intellectual individuals who are researchers, inquisitive, can take initiative, are competitive, have strong social relations, are confident, creative, can make the right decisions, renew themselves in the light of contemporary developments, solve problems through mind and science, adopt the fundamental principles of the Republic, and be full of Atatürk's love.

Organizing physical, social and cultural activities with the aim of supporting University of Kyrenia students in their social and cultural development in line with the principles of Atatürk, enabling students to make the most of these opportunities by providing facilities for this purpose and supporting them to manage their extracurricular time efficiently is among our duties.

# QUALITY MANAGEMENT

Our programs are approved by local and international authorities and regular inspections are carried out.

The majority of the University's Maritime programs are implemented in full compliance with the regulations and standards laid down by the International Maritime Organization (IMO), and the Ministry of Transport, Maritime Affairs and Communication of the Republic of Turkey.

University of Kyrenia FTO is approved by Turkish Civilian Aviation Authority, Directorate of General Civilian Aviation (DGCA), with the certification number: TR-FTO (A)-32. Inspections, as part of the quality assurance, are carried out by the DGCA and Internal Quality Management Team in accordance with International Civil Aviation Organization (ICAO) and European Aviation Safety Agency (EASA) regulations and requirements.
