

GİRNE UNIVERSITY
UNIVERSITY OF KYRENIA

University of Kyrenia 2024-2025
Promotion Catalogue

FOUNDING RECTOR MESSAGE

Dear Young People and Dear Families,

I would like to say hello to you by stating that we are proud of the point that University of Kyrenia, which we established by following a dream, has reached in a short time.

While establishing our university, we dreamed of creating an environment where our students can complete their education life safely and happily in the unique nature of Kyrenia, with the infrastructure where they can practice in their fields. Our greatest wish is to raise competent and well-equipped graduates who can work anywhere in the world, who experience interaction and tolerance between cultures with the presence of students from different countries. We have taken and continue to take new steps every year to make this dream and wish a reality. Our university, which was founded in 2013 with 3 Faculties including Maritime programmes and 10 programmes affiliated to 1 Vocational School, provides education in English and Turkish languages with 59 undergraduate, associate and graduate programmes approved by YÖK affiliated to 14 Faculties and 5 Vocational Schools as of the 2024-2025 academic year. In addition to basic sciences laboratory and infrastructure facilities ;

-Fully equipped Dr. Suat Günsel University of Kyrenia Hospital and Dr. Suat Günsel University of Kyrenia Dental Hospital, which provides infrastructure for the programmes within the Faculty of Medicine, Faculty of Dentistry, Faculty of Health Sciences and Vocational School of Health Services;

- The Flight Simulation Training System, where our Faculty of Aviation and Space Sciences and Pilotage students receive training, two training aircraft and the "Flight Personnel English Test Centre" serving at international level;

- Our two training and research vessels in use by our maritime programmes, our Maritime Safety Training Centre, our Ship Simulation rooms consisting of 7 separate units including the Captain's Lodge;

- 'Pre-clinical' Laboratory, Phantom Simulation Laboratory and Plaster Laboratory, which can be used by our Faculty of Dentistry students;

- Anatomy Laboratory, Histology-Embryology Laboratory, Microbiology, Microbiology Laboratory used in medical and health programmes Laboratory, Pathology Laboratory, Biochemistry Laboratory, Physiology Laboratory and Good Medical Practices our laboratory;

- Practice hotels belonging to our group, which can be used by the Tourism and Hotel Management programme,

- With clubs, social activities and more, we offer all kinds of opportunities to help you get started in life.

While providing the necessary academic and physical infrastructure for education and research, we are aware of the importance of your social development and enrich our curriculum with different contents such as clubs, events, conferences and panels.

Dear students; After graduating from our university, it is our greatest wish to fully prepare you for life, to graduate with happy and beautiful memories, to maintain our communication throughout the years, to develop and grow with your feedback, with the belief that you will be an ambassador of University of Kyrenia in your business life and in the countries you go to.

Dear parents; as a mother, I would like you to know that I understand all the concerns you have when sending your children, whom you have raised with love and care, to another city and another country, and with this awareness, we are making every effort to provide a safe and loving university environment for our prospective students.

With the hope of seeing you among us, I wish you all love and well-being...

To new horizons...

Assoc. Prof. Dr Cemre S. Günsel Haskasap
Founding Rector

RECTOR MESSAGE

Dear Young People

The education process is like a long-lasting marathon that spans years and requires intensive labour. Perhaps the most important decision of this process will be to choose a university that will guide your future, where you aim to graduate with happy memories and meet your expectations in the best way. University of Kyrenia has been continuously developing and growing since the day it was founded and has taken its place among the leading higher education institutions of the Turkish Republic of Northern Cyprus with its achievements.

Although the University of Kyrenia has been established recently, it is based on the long years of education and training experience of its founders. In this context, our University started to provide education in 2013 by taking over the Maritime, Maritime Business and Management, Marine Sciences Faculties, Maritime Transport Management Engineering Graduate Programme and Maritime Vocational School programmes of the sister Near East University with all their infrastructure and superstructures, which stand out with their 26 years of deep-rooted maritime education tradition until that day. Thus, University of Kyrenia has been structured as an ideal higher education institution with its students, academic staff, the necessary infrastructure for education, management and experience and tradition from the past. The correct structuring immediately manifested itself in academic, administrative and scientific fields. In this context, our very strong academic staff, which has a high scientific research capacity and is rising, is signing quality scientific publications that can be proud of. In scientific quality publications, we are ahead of those whose establishment dates go back to before our University and whose staff is more. We have successfully passed the YÖDAK-YÖK audits in academic and administrative competence.

As University of Kyrenia, we have been working together with our students, academics, lecturers and administrative team since the first day. We strive to provide quality, interdisciplinary education with a participatory, student-oriented approach that respects differences. We accept the thank you messages sent by our graduates from different parts of the world and the successes they have achieved as an indicator of this endeavour, but we are not content with this, we improve ourselves every day.

We invest in the most up-to-date infrastructure required by our programmes with the learning environments we have created based on the principles stipulated by our main mission and we continue to develop by using technology in the most effective way. The Faculty of Aeronautics and Astronautics Flight Simulation Training Device, the Ship Simulation Systems used in maritime programmes, which are the cornerstone of their education, our laboratories that offer application opportunities to our students studying in health-related fields, as well as Dr. Suat Günsel University of Kyrenia Hospital and Dental Hospital are good examples of the steps we have taken in line with this goal. Our experienced academic staff consisting of the best in their fields, our administrative staff that our students can reach at any time, and our international students who provide multiculturalism will make important contributions to your educational life.

Aware of 21st century realities and the expectations they create, we take into account that our students' physical and personal development is important as well as the professional knowledge and skills they will use in their careers, and we support them to take part in activities related to their interests and activities of student clubs throughout their education at our university.

In the dynamic environment of our university, which is the only campus located on the seafront in Kyrenia, the pearl of Northern Cyprus, I wish you an educational life full of days that you will shape your future by experiencing safe and qualified student life as a student of our university, accumulate happy memories with long-lasting friendships, and remember with a smile.

With love and respect,

Prof. Dr İlkey Salihoğlu
Rector

WHY UNIVERSITY OF KYRENIA?

University of Kyrenia (UG) was established in 2013. It took over the faculties of Maritime Studies, Maritime Management and Management, Marine Sciences, Maritime Transport Management Engineering Graduate Programme and Maritime Vocational School programmes from Near East University with all its infrastructure and superstructures and was structured as an ideal higher education institution in a short time.

As of the 2024-2025 academic year, University of Kyrenia, which adopts an innovative education model that puts the student at the centre, provides education in English and Turkish languages with 59 undergraduate, associate degree and master's degree programmes approved by the Council of Higher Education (YÖK) affiliated to a total of 14 Faculties and 5 Vocational Schools. With the new programmes planned, we contribute to the development of our country and region by providing education, training and research.

University of Kyrenia

- Innovative education model that puts the student at the centre;
- Faculties of Medicine and Dentistry, which are fully equipped with state-of-the-art hospitals, health laboratories and imaging devices;
- The Faculty of Aeronautics and Astronautics, including the Pilotage programme, which offers training with two training aircraft, Flight Simulation Training System, Mechanics Laboratory;
- 3 Faculties and Vocational School programmes specialising in 'Maritime and Maritime Management' with two training and research vessels, Maritime Safety Training Centre and high-tech simulation rooms;
- International quality programmes required by the public and private sectors;
- Expert academic and administrative staff;
- The opportunity to benefit from the experience, resources and infrastructure of the sister institution Near East University;
- Modern campus located in the city centre, on the seafront, secure location;
- It is one of the fastest growing universities in Cyprus with 89.35% general scholarship rate and

economical package options for the 2024-2025 academic year.

DISCOVER THE ISLAND

Imagine an island that bears the glow of having been home to different cultures and civilisations for centuries. Imagine an island with a rich heritage of archaeology, history and culture. Here you will spend your education life on this island. The Turkish Republic of Northern Cyprus (TRNC) is a Mediterranean country established in the north of the island of Cyprus in the Eastern Mediterranean, with a population of 374,299 according to 2019 data. The country has 5 major cities, each with unique beauty and historical values: Nicosia, the capital, Famagusta, Kyrenia, Kyrenia, Güzelyurt and Lefke. Selimiye Mosque (St. Sophia Cathedral), Bellapais Monastery and Karpaz Peninsula, which are among the beauties worth seeing, can be added to many more.

Our university will organise some city tours in order to enable all our students who will spend their education life here to discover the beauties. The dates and times of the tours will be announced on the school's website, official Facebook, Instagram and Twitter pages. Do not forget to stay tuned to participate.

ST. HILARION CASTLE

WHY KYRENIA?

Kyrenia, which dates back to the 10th century BC, is a port city bearing the traces of various civilisations that dominated the island as the centre of one of the ten kingdoms of Cyprus in the earliest times. The city has the Besparmak Mountains to the south and the Mediterranean Sea to the north. After the rule of the Persians, the British, the Lusignans and the Venetians, the Ottoman period began on 9 July 1570. Kyrenia, which was a port city during the Ottoman period, was reorganised as a port and holiday city by the British in the 20th century. Offering a unique atmosphere with its restaurants, bars and small hotels surrounding the horseshoe-shaped harbour where the old buildings are preserved, Kyrenia is one of the most ideal places in the Mediterranean for a beautiful life.

Kyrenia;

- Mediterranean climate and natural beauties
- Safe and peaceful atmosphere
- Coastline and clean beaches
- Historical places worth seeing (Kyrenia Castle, Sunken Ship Museum, Bellapais Monastery, Statue of Liberty, Landing Beach, Blue Pavilion etc.)
- Cultural activities,
- Mountain walks, nature discoveries, land, air and sea sports,
- With its entertaining venues, it provides students with a safe environment where they can develop their personalities socially throughout their education.

OPPORTUNITIES

Globally recognized Higher Education Council Approved Diploma

Education Fees in Turkish Lira

Fully Equipped Hospital

Fully Equipped Dental Hospital

Practice Hotels

Two Training Aircraft

Two Training and Research Vessels

Maritime Safety Training Center

Ship Simulation System

Laboratories

Wide Scholarship Opportunities

Cafeterias

Great Library

Stationery / Digital Printing Center

Near East Bank Branch and ATM

Accommodation (*)

(*) University of Kyrenia students are accommodated in Park Palace Residence dormitories, Apart Dormitories, Phoneix 74 dormitory and Phoneix 74 dormitory in Karakum, Kyrenia.

Students can benefit from the dormitories of Near East University (NEU). Dormitory rooms can be rented for a semester or for the whole academic year. Dormitory registration applications can be made on campus or at our representative offices abroad.

FACULTIES

FACULTY OF MARINE SCIENCES

The Department of Fisheries Technologies within the Faculty of Marine Sciences is a marine engineering department with a special focus on fisheries and fisheries technologies and aims to find solutions to the problems related to fisheries that exist universally and to increase awareness of various issues in this sector in both theoretical and practical terms.

Departments :

- Fisheries Technology Engineering(*)

Job Opportunities :

Graduates of the Department of Fisheries Technology can easily find jobs both in their own countries and in foreign countries as qualified staff in this sector, which now has a wide range of activities all over the world, or they can establish their own businesses.

FACULTY OF MARITIME

The vision of our Faculty of Maritime Studies is to be a leading educational and research institution in its geography, training talented staff equipped with universally recognised knowledge. Our mission is to train leading, qualified graduates who can produce instant and long-term solutions. Another important part of our mission is to meet the need for expert personnel in the rapidly developing world maritime fleet and to train seafarers equipped with universal maritime knowledge and skills in accordance with the standards stipulated by the Ministry of Transport, Maritime Affairs and Communications at the national level and the International Maritime Organisation (IMO) at the international level.

Departments:

- Marine Transportation Management Engineering (*)
- Ship Machinery Engineering (*)

Faculty Facilities:

- GMDSS Simulator (Global Maritime Distress Warning and Safety)
- Arpa Radar / ECDIS Simulator
- Tanker Simulator / Liquefied cargo handling simulator
- Machine Room Simulator
- Machine Control Room Simulator
- Hydraulic, Pneumatic and Automatic Control Laboratory
- Electrical, Electronic and Electrotechnical Laboratory
- Fully Equipped Bridge Simulator
- Navigation Equipped Simulator
- TEAL- Training and Research Ship-1
- TEAL Junior - Training and Research Vessel-2

Job Opportunities:

Graduates of the Department of Maritime Transport Management Engineering are graduated from Distant Way Watchkeeping Officer, 3rd or 4th Captain respectively,

They can work in positions up to Long Distance Captain. In addition, after gaining the necessary knowledge and skills in the maritime sector can work as a level manager. Marine Transport Management Engineering is one of the rare departments with a wide range of job opportunities and a low probability of unemployment.

Graduates of the Department of Naval Architectural Engineering can primarily work on ships in positions ranging from 4th engineer (Distant Voyage Shift Engineer) to Chief Engineer. In addition, they can work and take responsibility as engineers in various factories, shipyards, hotels, workshops and every technical field. Graduates of the

FACULTY OF MARITIME MANAGEMENT

Maritime transport still maintains its importance in the field of international trade. The main mission of our faculty is to train well-equipped young people with maritime business management skills. This equipment is related to scientific data covering port and ship management. National and international container transport sector is also included in the scope of business. The vision of our faculty is to educate young businessmen who can compete in this field and keep up with the ever-changing maritime sector. Our courses include a modern four-year programme, providing students with a wide range of theoretical and practical training.

Departments:

-Maritime Management (*)

Job Opportunities:

Graduates of the Department of Maritime Business Management can work as central personnel of maritime enterprises, port operator, agency, shiphandler, marine insurer and marina manager.

FACULTY OF DENTISTRY

Our faculty is prepared to provide world-class education with its academic staff, Dental Hospital and laboratories equipped with the latest technology. Our goal is to educate our students as scientifically fully equipped dentists, as well as being responsible, caring for public health, culturally rich, innovative, self-confident, successful in human relations,

To provide physicians who respect ethical values and, most importantly, who serve humanity by feeling the value and greatness of their profession in their souls.

Faculty Facilities :

Pre-clinical Laboratory

Phantom Simulation

Laboratory Plaster

Laboratory

Practical facilities of the Dental Hospital

Job Opportunities :

Graduates of the Faculty of Dentistry can work in public and private sector hospitals, university research hospitals, oral and dental health centres, private clinics. They can also open their own clinics or work as academicians.

FACULTY OF EDUCATION

The concept of "Educational Sciences" basically defines a general field that covers all processes and main topics related to education and school. From learning psychology to school guidance and counselling, from assessment and evaluation methods to classroom management, from the development of educational programmes to the determination of school management and educational policies, a wide range of study subjects are included under the title of educational sciences. As the Faculty of Education, we act with the vision of educating educational leaders who use information and communication technologies effectively for the needs of 21st century society and education, research, question while researching, participate, share, produce, respect social values by creating a contemporary teaching culture. The main basis of our faculty, which accepts the goal of training qualified teachers needed at national and international level as an important element of its mission, is

Mustafa Kemal Atatürk's words "The assurance of the future is based on a well-founded education and education is based on teachers".

Departments :

- English Language Teaching (*)
- Guidance and Psychological Counselling
- Turkish Language Teaching
- Special Education Teaching

Job Opportunities :

Graduates of the Department of English Language Teaching can work as English language teachers in primary and secondary schools as well as in the teaching materials, curriculum determination and educational supervision units of ministries of education. In addition, they can work in translation, media, foreign

FACULTY OF ARTS AND SCIENCES

In the Department of Psychology within the Faculty of Arts and Sciences, we aim to educate graduates who will contribute to the advancement of contemporary psychology and its application for the benefit of society and humanity. In this context, our main goal is to educate qualified psychologists who are equipped with the knowledge of psychology, closely follow the developments in their field, are at peace with their environment, take responsibility, and are productive.

Depart :

- Psychology

Job Opportunities :

Graduates of the Department of Psychology; They have the opportunity to be employed in mental and nervous hospitals affiliated to the Ministry of Health and universities, mental health centres, nurseries and child care centres, nursing homes, juvenile detention centres and prisons, guidance research centres, public opinion research centres, advertising and human resources.

FACULTY OF AVIATION AND SPACE SCIENCES

In our Faculty of Aviation and Space Sciences, there are programmes that offer professions that are in great demand today. The language of instruction has been determined as English in order to perform professions in the globalising world. Our vision is to be the best aviation faculty in its geography, which has a contemporary, innovative, creative mindset, entrepreneurial, strong social qualities, capable of conducting scientific studies at the international level, graduates with a solid aviation formation. Our mission is to have the identity of a distinguished educational institution that educates graduates who think, question, equipped with contemporary knowledge, research, access information easily, produce environmentally sensitive solutions in changing world conditions, continuously learn and present what they have learnt in an original way.

Departments :

- Aeronautical Engineering (*)
- Pilotage (Professional Pilot) (*)
- Aviation Management (*)

Faculty Facilities :

Flight Simulation System
(FSTD) 2 Training Aircraft
Computer Based Training
Room Mechanics
Laboratory
(ok Purpose Material Testing
Machine Forces in Crane
Structure
Dry Friction
Deformation of Crane Beam Euler
Buckling Deformation

Job Opportunities :

Graduates of the Department of Pilotage will be entitled to receive an Airline Transport Pilot Licence (ATPL) with a bachelor's degree. Graduates of the department will have the opportunity to find a job as a pilot in state-owned and private airline companies in the international arena.

Graduates of the Department of Aviation Management have the opportunity to be employed in air transport enterprises, airport and terminal enterprises, authorised aviation training institutions, authorised cargo

FACULTY OF LAW

The aim of our Faculty of Law, which aims to educate people with a strong legal mission for our country, which is founded on democratic and secular foundations, is to add value to our country with the jurists it educates, while shaping its future. The vision of the Faculty of Law is to be a preferred institution with its strong infrastructure that trains legal staff who can work with full competence in national and, when necessary, international judgeship and prosecution in the judicial system, who believe in the rule of law and justice, who are committed to ethical values.

Our mission is to train enlightened, knowledgeable and just legal staff who are equipped with strong theoretical and technical knowledge in both public and private law, who are committed to human rights, who have internalised the principles of contemporary universal law, who can perceive and interpret the developments in the society and the world in which they live, who can think independently and creatively, who can examine and research, who can assume social responsibility as well as individual responsibility.

Departments :

- Law

Job Opportunities :

Graduates of the Faculty of Law can carry out traditional legal professions such as judges, lawyers, prosecutors, notaries, as well as academicians, legal advisors in public institutions, experts in different fields or diplomats.

FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES

The mission of the Faculty of Economics and Administrative Sciences of University of Kyrenia is to provide world-class education with the cooperation of all stakeholders and to ensure that its graduates can find national and international jobs by providing the necessary knowledge and equipment in their fields. Our faculty aims to provide contemporary education and training to our students with dynamic academic staff with international knowledge and experience and constantly updated course programmes. Thanks to the education they receive, our students are trained as individuals who can both meet the needs of national markets and have the qualifications and necessary equipment to compete on a world scale.

Departments :

- Finance and Banking (*)
- International Business Management (*)
- Logistics Management (*)
- International Relations (*)

• Faculty Facilities :

- Practice Hotels

Job Opportunities :

Graduates of the Department of Banking and Finance are employed in public institutions and organisations and private sector enterprises operating in areas such as banking, financial investment, insurance, consultancy. Outside the finance sector, they can work in departments mainly related to money and investments such as strategic planning, accounting, finance and purchasing.

Graduates of Business Management can work in national and international institutions and organisations, industry, trade, informatics, public and private sector companies in functions such as marketing, sales, finance, human resources; can work in positions such as expertise, consultancy, management.

Graduates of the Department of Logistics Management; They can work in public or private sector air, land, sea

FACULTY OF HEALTH SCIENCES

University of Kyrenia Faculty of Health Sciences was established with the aim of educating health professionals who are equipped with the ability to solve problems, who are knowledgeable, competent, honest, who aim to serve humanity, who are respectful, understanding and responsible towards their patients, who contribute to the world of science by producing universal knowledge, who are culturally equipped, who have ethical principles and team understanding, and who have high self-confidence. The qualified teaching staff of our faculty provides students with a qualified education in theoretical and applied fields. In addition, practical training is carried out under the supervision of faculty members and experienced colleagues at Dr Suat Günsel University of Kyrenia Hospital equipped with state-of-the-art systems.

Departments:

- Nursing
- Nutrition and Dietetics
- Physiotherapy and Rehabilitation

Job Opportunities :

Graduates of the Department of Physiotherapy and Rehabilitation are entitled as "physiotherapist" and can work in public and private hospitals, medical centres, exercise counselling centres, special education centres, sports clubs, gyms, nursing homes, healthy life centres, rehabilitation centres, university hospitals and open private exercise counselling centres.

Graduates of the Department of Nursing; public or private institutions; hospitals, health centres, rehabilitation centres, special branch centres, community health and family health centres, workplaces, formal and non-formal education institutions, home care services, nursing homes, dispensaries, nurseries, etc. They can work as nurses in institutions or as academicians in higher education institutions.

Graduates of the Department of Nutrition and Dietetics can work in treatment institutions (private and public hospitals, polyclinics, health centres, dialysis units, slimming centres, etc.), public health service institutions (maternal and child health centres, family health centres, child and elderly nursing homes, sports schools, etc.), private nutrition-diet centres, mass nutrition units (food factories, hotel food and beverage departments, all private and public institutions where mass nutrition is provided, etc.), food industry, research institutions, educational institutions and visual and written institutions.), private nutrition-diet centres, mass nutrition units (food factories, hotel food and beverage departments, all private and public institutions, etc.), food industry, research institutions, educational institutions and visual and print media can work in the preparation and execution of nutrition programmes. Graduates can pursue an academic career with master's and doctoral research at universities if they wish. **Laboratories :** Nursing Vocational Skills Lab

FACULTY OF ARCHITECTURE

As the Faculty of Architecture, our mission is to educate architects and interior architects who compete on national and international platforms, who have scientific and technological equipment, who protect, guide and develop our environment, enrich aesthetic values, respect ethical values, are creative, leaders who combine disciplines, with a strong education staff who are experts in their fields of international quality. Our vision is to be proud of architects who are sensitive to our environment in the field of architecture and interior architecture, competing in international platforms with their original works with high aesthetic values, and to be in an effective and leading position with our education and research. Our faculty aims to ensure that students and faculty members are in a strong solidarity, sharing, participatory, solidarity and harmony within the institution, as well as a strong infrastructure and technical equipment to ensure the healthy development of all these.

Departments :

- Architecture

Job Opportunities :

Graduates of the Department of Architecture have job opportunities as architects in public institutions and organisations, relevant ministries, municipalities, private design studios as well as the opportunity to create their own business opportunities by opening their own offices.

Laboratories :

- Computer Laboratory / AutoCAD Laboratory
- 

A top-down view of an engineering workspace. A yellow hard hat sits at the top left. A yellow level and a yellow tape measure are at the top center. A pair of black-rimmed glasses and a pair of yellow and black earmuffs are at the top right. A person's hands are visible, holding a yellow pencil and pointing at a technical drawing on a blueprint. The blueprint is covered with various engineering drawings, including a large one with dimensions like 4.00, 2.00, 5.00, and 5.70. A protractor and a vernier caliper are also visible on the right side of the blueprint. A laptop is partially visible on the left side.

Faculty of Engineering

As the Faculty of Engineering, our goal is to educate engineers who can compete internationally, offer original, innovative and sustainable solutions to the problems they face, have high application skills, work in interdisciplinary teams and assume key positions.

Our mission is to be the focus of technology-based science in our country and in the world by providing quality education and research opportunities,

To graduate engineers who are environmentally conscious, open to development, respectful to ethical values. Our vision is to be a faculty with an academic staff who have adopted the principle of lifelong learning and teaching with contemporary science and technology and research, constantly updating research, development and education and training infrastructure, developing projects that will transform knowledge into social and industrial benefits, creating clean production awareness with the harmony of ecological - technological - economic components, prioritising intellectual accumulation and interdisciplinary cooperation, being preferred in the first place, respecting ethical values.

Departments :

- Electrical and Electronic Engineering (*)
- Computer Engineering (*)
- Mechanical Engineering (*)
- Civil Engineering (*)
- Software Engineering (*)

Job Opportunities :

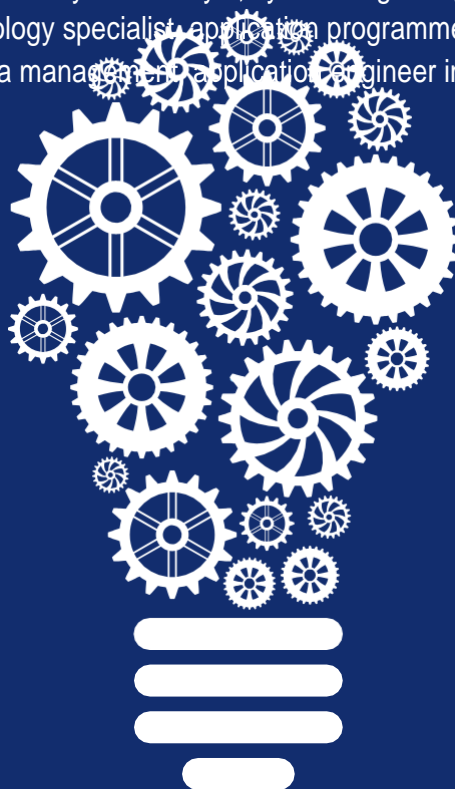

Graduates of the Department of Computer Engineering have a wide range of job opportunities in private and public institutions in many technical fields such as system engineer, system programmer, design engineer, programmer, information technology specialist, communication network engineer.

Civil Engineering graduates; all kinds of buildings, dams, airports, bridges, roads, harbours, ports, sewers in the private or public sector,
They have the opportunity to work in the fields of planning, designing, construction and supervision of service and industrial structures such as water network, etc.

Graduates of the Department of Mechanical Engineering have the opportunity to work in various branches of industry such as product development, planning, purchasing, quality control, marketing, after-sales services and maintenance and repair, engineering and consultancy services, building mechanical system design and application. Various energy issues such as power plants, petroleum, natural gas/LPG, solar and wind energy are also the main fields of study of mechanical engineers. Continuously developing technology and industry, the increase in comprehensive building constructions, energy efficiency, which is becoming more and more important every day due to the energy bottleneck, and the interest in alternative energy sources increase the market demand for graduates.

Graduates of the Department of Electrical and Electronics Engineering can work in the fields of power systems engineering, communication systems engineering and industrial control systems engineering. In addition, they can take part in the project, assembly and operation of facilities that produce and consume electrical energy, and can work in communication, industrial and medical devices, that is, in every field where electronic devices are used.

Graduates of the Department of Software Engineering can be employed in government offices, municipalities, private companies, their own workplaces and educational institutions. Students who graduate from this department will be able to find jobs as system analyst, system engineer, design engineer, web design and program specialist, information technology specialist, application programmer, management in information processing centres of companies, data management, application engineer in computer-aided industrial design and realisation, data miner.

FACULTY OF MEDICINE

Our Faculty of Medicine aims to educate tomorrow's leaders in the field of medicine who prioritise research, scientific thinking and production, serving public health, and who can successfully represent themselves, their institution and our country in the national and international arena with its distinguished faculty and aims to be an education and health institution at universal standards.

In addition to the technological infrastructure facilities of the campus, one of our greatest strengths is the opportunity for students to carry out the majority of their practical training at Dr Suat Günsel University of Kyrenia Hospital, equipped with the latest technology, under the supervision of faculty members and experienced staff. The courses are enriched with professional and clinical skills and are planned to provide students with experience in the practical applications of the medical profession from day one. In addition, research methodology, ethical and social

The programme is enriched with courses with content.

Departments :

Medicine

Faculty Facilities :

- Anatomy Laboratory
- Histology-Embryology Laboratory
- Microbiology Laboratory
- Pathology Laboratory
- Biochemistry Laboratory
- Physiology Laboratory
- Practical facilities of the hospital

Job Opportunities :

Graduates of the Faculty of Medicine; public and university hospitals, private hospitals and polyclinics, health centres

FACULTY OF TOURISM

University of Kyrenia, Faculty of Tourism was established in 2020 to serve our national and international students under two departments with Gastronomy and Culinary Arts and Tourism Management undergraduate programmes.

The mission of the University of Kyrenia Faculty of Tourism is to provide world-class education in cooperation with all stakeholders and to provide students with the necessary knowledge and equipment in their fields. The underlying understanding of the undergraduate education carried out in our Faculty of Tourism is to establish a close communication with students and to enable students to bring their questions and expectations on academic and social issues to the attention of the faculty and faculty management. In this approach, which is different from the traditional understanding of education, education-teaching is not seen as a one-way process, a process in which only lecturers give lectures. According to this approach, education is a two-way process, an interaction between students and instructors. In this context, it is important for students to establish a close communication with lecturers, department and faculty administrators both during and outside the course environment.

Departments :

Gastronomy and Culinary Arts
Tourism Management

Job Opportunities :

Hotels, Restaurants, holiday villages, tourism agencies

VOCATIONAL SCHOOLS

MARITIME VOCATIONAL SCHOOL

Maritime Vocational School aims to train qualified officers who are equipped with knowledge and skills according to the requirements of the age, equipped with the knowledge and skills according to the requirements of the age, equipped with knowledge and skills according to the requirements of the age, able to solve problems in accordance with team work, aware of professional ethics, aware of the information about entrepreneurship, have leadership qualities, self-confident and provide the necessary equipment in every subject, and meet the need for qualified manpower in the maritime field of our country.

In DMYO, an interactive education has been adopted that will enable our students to become professional people who have ethical values, respectful to the environment, sufficient professional knowledge, intellectual accumulation, pluralistic, innovative and socially responsible throughout the education and training process that the sector needs.

Departments :

- Maritime Transport and Management (*)
- Ship Machinery Management (*)
- Maritime and Port Management (*)

Facilities :

- GMDSS Simulator (Global Maritime Distress Warning and Security System)
- Arpa Radar / ECDIS Simulator
- Tanker Simulator / Liquefied cargo handling simulator
- Machine Room Simulator
- Machine Control Room Simulator
- Hydraulic, Pneumatic and Automatic Control Laboratory
- Electrical, Electronic and Electrotechnical Laboratory
- Fully Equipped Bridge Simulator

Job Opportunities :

Students who graduate from the two-year Maritime Transport and Management programme are entitled to take the "Watchkeeping Officer" exams organised by the Seafarers Examination Centre (GASM) affiliated to the Ministry of Maritime Affairs after completing 12 months of practical sea training. As a result of the exam, they can work on private and public vessels of 500-3000 Gross Tonnes with the qualification of Watchkeeping Officer. Afterwards, they are qualified as First Officer of the Watch and Captain.

Students who graduate from the two-year Ship Machinery Management programme are required to undergo 6 months of practical sea training. Subsequently, they are entitled to take the "Engineer Officer" exam of the Ministry of Transport, Maritime Affairs and Communications of the Republic of Turkey.

- Navigation Equipped Simulator
- TEAL- Training and Research Ship-1
- TEAL Junior - Training and Research Vessel-2

VOCATIONAL SCHOOL OF HEALTH SERVICES

In our University of Kyrenia Vocational School of Health Services (SHMYO), in addition to qualified education and training staff; By organising our education and training programmes in cooperation with the Faculties of Medicine, Health Sciences, Dentistry, Engineering and Education, With the infrastructure facilities of our full-fledged hospital, polyclinics and laboratories, we aim to train qualified health personnel / technicians who are preferred in the areas needed and who are aware that education is continuous. In addition to intensive theoretical and practical application within the 2-year education period, our students do 30 working days of professional summer internship practice in the summer term. Apart from the University of Kyrenia Hospital and polyclinic facilities in all cities of TRNC, our students also have the opportunity to benefit from the facilities of University Hospitals and Public Education and Research Hospitals throughout Turkey for both semester practice and summer internship.

Departments :

- Oral and Dental Health
- Anaesthesia
- Physiotherapy
- First and Emergency Aid
- Medical Imaging Techniques

Job Opportunities :

Graduates of the Department of Oral and Dental Health; oral and dental health centres, large polyclinics, hospital dental services and can find the opportunity to work in medical practices.

Graduates of anaesthesia department have the opportunity to work in private enterprises, ministry of health, private hospitals / clinics, state hospitals and clinics, private / state medical imaging centres, private ambulance service health institutions, as well as self-employment.

Graduates of physiotherapy department; They can work in public and private inpatient / outpatient health institutions and organisations and rehabilitation centres affiliated to the Ministry of Health, inpatient / outpatient health institutions and organisations affiliated to universities, Physical Therapy and Rehabilitation clinics and private branch centres.

Graduates of the Department of First and Emergency Aid; private businesses, the Ministry of Health, private hospitals / clinics, state hospitals and clinics, private / state medical imaging centres, private ambulance service health institutions, as well as have the opportunity to work freelance.

Graduates of Medical Imaging Techniques have the opportunity to work in private businesses, ministry of health, private hospitals / clinics, state hospitals and clinics, private / state medical imaging centres. Graduates of the Elderly Care programme can work in Social

Vocational School of Aviation

In our Aviation Vocational School, there are programmes to meet the need for well-educated intermediate staff in the civil aviation sector, which is in great demand today and where employment is intense.

Our vision is to be the best aviation vocational school in its geography, which produces graduates who are modern, innovative, conceptual thinkers, have strong social qualities, can make fast and correct decisions, have a solid aviation formation and have a good command of operational level activities. (Our mission is to have the identity of a distinguished educational institution that raises graduates who are equipped with contemporary knowledge, research, easily access information, can produce environmentally sensitive solutions in changing world conditions, are open to learning and can reveal what they have learned.

Departments :

(Graduates of the Department of Environmental Protection and Control will be able to find jobs in institutions such as Waste Water Treatment Plants, Recycling Plants, Drinking Water Treatment Plants, Municipalities, Ministry of Environment and its affiliated units, hospitals affiliated to the Ministry of Health, Private Hospitals and Ministry of Public Works and Settlement.

Vocational School of FOREIGN Languages

University of Kyrenia School of Foreign Languages consists of three separate units. The Undergraduate English Unit, Modern Languages Unit and Academic Writing Centre under the umbrella of the University of Kyrenia School of Foreign Languages meet the foreign language learning needs of all faculties and colleges of the University at undergraduate and postgraduate level.

The Undergraduate English Unit is responsible for the execution of compulsory and elective English courses offered for credit in all faculties and colleges of the university whose medium of instruction is English. The main objective is to contribute to the acquisition and development of reading, listening, oral and written communication skills necessary for students to follow their educational and training activities (academic and professional). The aim of the Modern Languages Unit is to provide elective German, French and Greek courses as second and third languages to all departments of the university. The unit accelerates the cultural development of students by conducting courses at the level of "basic user" (A1 and A2) and "independent user" (B1) according to the Common European Framework of Reference for Languages. The Academic Writing Centre, on the other hand, aims to inform students about the standards to be followed when submitting scientific studies such as projects, articles and theses in writing for faculty courses. In addition to the Academic Reading and Writing Techniques courses offered as part of the Undergraduate English Unit, the Centre aims to help students develop an effective academic writing style through seminars and workshops.

Sections:

- Undergraduate English Unit
- Modern Languages Unit
- Academic Writing Centre

Within the University of Kyrenia, there are courses that we continue with distance education method. These courses differ according to faculties. However, Atatürk's Principles and History of Turkish Revolution, Turkish Language and English courses are offered jointly to both Turkish and foreign students through UZEM. Thanks to the distance education platform of our university, students can easily access all course materials on the system and they can reach the lecturers who teach the course whenever they wish.

ENGLISH PREPARATORY SCHOOL AND EXEMPTION

The aim of the English Preparatory Programme is to provide students with the necessary language skills to enable them to continue their undergraduate education more easily. The level of English aimed to be acquired by the students at the end of the programme is equivalent to the Common European Framework of Reference for Languages B1 or B1+ (for graduate programmes, Pilotage and English Language Teaching). Students are required to take the English Proficiency and Placement Examination for admission to English-taught programmes. The minimum passing grade out of one hundred (100) is 75 for the Department of Pilotage, 70 for the Department of English Language Teaching and Graduate Programmes, and 60 for other departments. Students who certify that they have scored at or above the accepted level in various exams, especially [IELTS](#) and [TOEFL](#), are exempted from the English Proficiency Exam. You can find information about other international exemptions and the required scores on our web page.

SCHOLARSHIPS

With the Turkish Lira Tuition Fee and high general scholarship rate, University of Kyrenia students can benefit from various scholarships and discounts: ÖSYM Scholarship, Preference Scholarship, TRNC Student Scholarship, Special Package Discount, Sibling Discount, Credit and Hostels Institution Scholarship, etc. Please [visit](#) our website www.kyrenia.edu.tr for current scholarships and details.

REGISTRATION

I. Admission Requirements for TRNC, (ift) Citizens and Turkish Citizens who have completed 4 years of high school in TRNC without interruption:

TRNC citizens and Turkish Republic citizens who have completed their high school education in a formal education institution in the Turkish Republic of Northern Cyprus without interruption can enrol in the undergraduate and associate degree programmes of the University of Kyrenia, as a result of the University of Kyrenia Student Placement and Scholarship Ranking Examination held every year, taking into account their preferences and the number of quotas of the department they prefer and the score they received in the exam. Students who are successful as a result of the exam can receive scholarships at varying rates.

II. Registration and Admission Requirements for Turkish Citizen Students : Turkish Citizen students are admitted and enrolled in our university in accordance with the conditions determined by the Higher Education Council of the Republic of Turkey and according to the results of the exams organised by the relevant institution every year. Horizontal and Vertical Transfer applications are evaluated and finalised in accordance with the relevant regulations and principles and student registration is made. The documents required for registration are available in detail on our web page.

Higher Education Institutions Exams;

- Students must have been placed in the 4-year programmes and 2-year programmes of our university by obtaining sufficient points as a result of the University Entrance Examinations of the year in which they are enrolled and organised by the Council of Higher Education of the Republic of Turkey.
- For the departments of the Faculty of Maritime Studies and Maritime Vocational School, students are required to obtain a "Seafarer's Health Report", and the Seafarer's Health Report must be approved by the Port Authorities (before the expiration of 1 month) before the registration process.
- Candidates for the Pilotage Department are required to obtain a "Class 1 Health Report" and a Criminal Record. Class 1 Health Report is given from the health institutions (Aviation Medical Centres) authorised by DGCA in Turkey or from the authorised health institutions in their country. The documents required for registration are available in detail on our web page.

III. Registration Requirements for Turkish Citizen Students who completed high school abroad : Turkish citizen students who have completed high school abroad can register with the ÖSYM exam or by bringing one of the following documents.

- SAT 1 (Minimum 1000 points)
- ACT (Minimum 21 points)
- Abitur
- French Baccalaureate
- GCE A Level Certificate (Minimum 2 subjects)
- International Baccalaureate (International Baccalaureat IB)
- Austrian Matura Diploma (Matura Reifezeugnis)
- Italian Maturita Diploma (Diploma di Maturita)

For the Admission and Registration Requirements of the Faculty of Aviation and Space Sciences, Department of Pilotage and the Faculty of Maritime Studies, School of Maritime Studies and Maritime Vocational School programmes that require special conditions, please visit the website under the heading of Prospective Students.

Please refer to the information.

DOCUMENTS REQUIRED FOR REGISTRATION

1. Photocopy of Identity Card
2. Original high school diploma or original graduation certificate
3. 6 passport size photographs
4. Tuition fee receipt (according to the selected payment plan)
5. Pre-registration and semester social activity fee payment receipt
6. In Medicine, Dentistry and Pilotage programmes, registration must be made by paying the semester fee during registration.
7. Students who have completed 4 years of high school education in TRNC without interruption are required to bring a document proving this situation from the school they graduated from.

SOCIAL LIFE AND UNIVERSITY ACTIVITIES

In addition to its historical and natural beauties, Northern Cyprus offers students the opportunity to socialise and develop themselves with different alternatives such as beaches, camping areas, hiking trails, paragliding, concerts, local festivals.

At the University of Kyrenia, as well as giving importance to quality education, many activities that reinforce this are also organised. New activities and event opportunities are provided every year in line with the wishes of the students. Our university, which is located very close to Kyrenia city centre, also uses this advantage in its social and cultural activities.

The university organises different activities for students throughout the year:
Orientation Programmes for New Students, International Student Day, White Coat Wearing Ceremonies, Career Days, Traditional Maritime Uniform Exchange Days, Spring Tournaments, Trips to Historical and Natural Places in TRNC, Conferences, Seminars, Conversation Meetings, etc.

LIBRARY

Libraries are one of the most important supporting elements of education. The modern understanding of education directs students to research, learn and make comments instead of memorising subjects. It is not possible to realise an education in this understanding without libraries. University of Kyrenia Library is a library with high standards that adopts the developing and changing understanding of library and librarianship, aiming at the best level of access and sharing of information.

In our library:

- 20,000 (*) written press sources,
 - Access to 1.500.000 electronic resources, a
 - database, a seating area for 100 people and
 - a comfortable working environment,
- Fully equipped, publicly available computers with internet connection and open wi-fi network,
- Racking system designed according to L.C. classification used in USA, Canada and Mexico is available.

(Our students also have the right to access and use the Grand Library at Near East University, which is open 24/7).

In addition, the newly constructed University of Kyrenia Grand Library, which was built in the ever-growing University of Kyrenia, serves students and the people of the region 24 hours a day with its 6-storey modern and well-equipped building on an area of 8,750 square metres. In the University of Kyrenia Grand Library, which will be the largest library in the Kyrenia region, users can access 500 thousand books and 650 million electronic resources. University of Kyrenia Grand Library is designed to increase the scientific productivity of the region as well as the mobility in social

and cultural life. A 350-seat lecture theatre, 3 120-seat halls and classrooms and 4 meeting rooms within the library are also available for the use of the people of the region.

STUDENT CLUBS

The participation of our students in student clubs and activities is considered as important as their academic education and is supported in order for our students to come together with activities related to their interests, to develop themselves socially with their individual talents, to make teamwork, to develop a different perspective by blending their interests with their education. Students are free to become a member of any club they want from the existing clubs or to establish a new club within the framework of the procedures of our university.

- Chess Club
- Dance Club (GÜDANS)
- (home and Social Responsibility Club
- Hezarfen Aviation Club
- Maritime Club (GÜDEK)
- Media and Photography Club (GÜFOM)
- Medicine Club
- Music Club (GÜMÜK)
- Nature Sports Club (GÜDOSK)
- Psychology and counselling club
- Sailing Club
- Search and Rescue Club (GÜAKUT)
- Theatre Club
- Water Sports Club (GÜSAS)
- Yoga Club
- Fenerbahçe Fan Club
- Galatasaray Fan Club

QUALITY MANAGEMENT

Our programmes are subject to standard audits carried out by the relevant national and international authorities. Maritime programmes comply with the requirements and standards stipulated in the relevant regulations of the International Maritime Organization (IMO) and the Ministry of Transport, Maritime Affairs and Communications.

University of Kyrenia Flight Training Organisation (UEO) provides theoretical flight training, which are the basic courses for the Department of Pilotage. UEO is authorised by the Directorate General of Civil Aviation (DGCA), the competent authority in Turkey in the field of Civil Aviation.

Approved with certificate numbered TR-FTO (A)-32. UEO has a unique "Quality Management System" approved by DGCA, which includes the Quality Assurance System defined in the "UEO Quality Management Manual". Within this scope, inspections are carried out by DGCA and Internal Quality Management Team in accordance with the regulations and rules of International Civil Aviation Organisation (ICAO) and European Aviation Safety Agency (EASA).

NEAR EAST UNIVERSITY (YDÜ) DORMITORIES

There are a total of 12 blocks of dormitories on NEU campus. Dormitory rooms are for single, double, triple or quadruple occupancy and are organised in 4 different types: Economic, Standard, Luxury and Residence. Regular transport service is provided between University of Kyrenia and NEU, taking into account the course programmes. For detailed information:

<https://aday.kyrenia.edu.tr/index.php/tr/aday-ogrenciler/yurtlar-ve-lojmanlar/yurtlar-detay/>

JOINT FACILITIES WITH YDÜ

NEU Sports facilities include 1 football, 4 multi-directional sports halls, 1 gymnasium, 2 tennis courts and outdoor sports fields. Students can benefit from all sports facilities and the Olympic Indoor Swimming Pool free of charge.

How can we benefit from the facility?

In order to use the facility, a health certificate must be obtained from the NEU Sports Tower. The health certificate is issued in the light of the scientific evaluation of the controls and examinations to be carried out at the Health Unit and the physical fitness tests to be carried out at the Performance Laboratory.

NEAR EAST UNIVERSITY HOSPITAL

Its experienced and expert staff provides 24-hour uninterrupted health services to all students and patients. The hospital, located within the NEU campus, provides free healthcare services to all Republic of Turkey citizen students studying in the TRNC within the scope of the Social Security Institution (SSI). Within the scope of free healthcare service, students can benefit from all medical units including Emergency, Polyclinic and Operation units at the Near East Hospital on a seven-day twenty-four hour (7/24) basis.

HEALTH SERVICES

DR SUAT GÜNSEL GİRNE UNIVERSITY HOSPITAL

It has been in service since 15 November 2016 with its superior technological equipment, technical features and experienced staff. Our hospital has been designed in a format that prioritises patient and employee health and safety in an area of approximately 15.000 m² within the University of Kyrenia campus, integrated with the Faculties of Medicine and Health Sciences and student lecture theatres.

With the smart hospital automation system installed, uninterrupted environment and patient safety, patient comfort, medical information sharing and security are ensured and continuously monitored.

Dr Suat Günsel University of Kyrenia Hospital, built in a boutique hospital concept, is a fully equipped hospital with a total capacity of 150 beds and 24/7 uninterrupted service.

Dr Suat Günsel University of Kyrenia Hospital provides world-class healthcare services to our patients with its superior technological capacity and distinguished faculty members and doctors, each experienced in their field.

University of Kyrenia has a fully equipped hospital and a dental hospital.

Near East University Hospital has a Social Security Institution (SSI) agreement that every Turkish citizen student enrolled in Cyprus universities can benefit from.

Private Health Insurance covers medical treatment in contracted hospitals in Northern Cyprus.

DR SUAT GÜNSEL GİRNE UNIVERSITY DENTAL HOSPITAL

Opened on 4 October 2017, Dr. Suat Günsel University of Kyrenia Dental Hospital **prides itself** on patient safety and quality service in the field of health. The clinics of the Faculty of Dentistry Hospital are designed to provide services for oral, dental and maxillofacial health and disorders with technological equipment, methods and materials used in the most developed countries of the world.

REGISTRATION OFFICES AND REPRESENTATIVE OFFICES IN TURKEY

Our main goal is to facilitate the registration process by answering the questions of prospective students and parents about our university with our registration offices and representative offices consisting of our university staff spread in different regions of Turkey.
